Supplement dated April 23, 2021 to the currently effective Statutory Prospectuses and Statements of Additional Information as each may be supplemented, for the Funds

This supplement provides new and additional information beyond that contained in the currently effective Statutory Prospectuses and Statements of Additional Information.

Effective April 30, 2021, the calculation of the Funds’ Intraday Indicative Values will be discontinued. As a result, effective as of such date:

- 1. In the Statutory Prospectus for each Fund, the sections entitled “Share Trading Prices and Intraday Indicative Value” and “Share Trading Prices”, as applicable, are deleted in their entirety.**
- 2. In the Statement of Additional Information for each Fund, the third paragraph in the section entitled “Exchange Listing and Trading” is deleted in its entirety.**

In addition, effective immediately, the following change to the Statement of Additional Information for each Fund is made to update the Exchange requirements listed in the “Exchange Listing and Trading” section due to Rule 6c-11 of the Investment Company Act of 1940, as amended:

- 3. In the Statement of Additional Information for each Fund, the second paragraph in the section entitled, “Exchange Listing and Trading” is deleted in its entirety and replaced with the following:**

The shares of the Fund are listed and traded on the Exchange identified on the cover of this SAI at prices that may differ from a Fund’s NAV. There can be no assurance that the Exchange requirements necessary to maintain the listing of the shares of the Fund will continue to be met. The Exchange may, but is not required to, remove the shares of the Fund from listing if, among other matters: (i) the Exchange becomes aware that the Fund is no longer eligible to operate in reliance on Rule 6c-11 of the Investment Company Act; (ii) if the Fund no longer complies with the requirements set forth by the Exchange; (iii) following the initial 12-month period after commencement of trading of the Fund, there are fewer than fifty (50) Beneficial Owners (as that term is defined below) of the shares of the Fund; or (iv) such other event shall occur or condition exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove the shares of the Fund from listing and trading upon termination of the Fund.

Trading prices of Shares on the Exchange may differ from the Fund’s daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE.

Fund shares are not individually redeemable. Fund shares are or will be listed on NYSE Arca, Inc. ("Exchange").

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Funds' shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Funds (if you hold your Fund shares directly with the Funds) or from your financial intermediary, such as a broker-dealer or bank (if you hold your Fund shares through a financial intermediary). Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold your Fund shares directly with the Funds, you may elect to receive shareholder reports and other communications electronically from the Funds by contacting the Funds at 855-857-2638 or, if you hold your Fund shares through a financial intermediary, contacting your financial intermediary.

You may elect to receive all future reports in paper free of charge. If you hold your Fund shares directly with the Funds, you can inform the Funds that you wish to continue receiving paper copies of your shareholder reports at 855-857-2638 or, if you hold your Fund shares through a financial intermediary, contacting your financial intermediary. Your election to receive reports in paper will apply to all of the KraneShares Funds you hold directly with series of the Trust or through your financial intermediary, as applicable.

Fund Summary

KFA Dynamic Fixed Income ETF

Investment Objective

The KFA Dynamic Fixed Income ETF (the “Fund”) seeks to provide investment results that, before fees and expenses, track the price and yield performance of a specific fixed income securities index. The Fund’s current index is the FTSE US High-Yield Treasury Rotation Index (the “Underlying Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. The table and Example below do not include the brokerage commissions or bid-ask spread that you may pay when purchasing or selling shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.45%
Distribution and/or Service (12b-1) Fees*	0.00%
Other Expenses	0.01%
Total Annual Fund Operating Expenses.	0.46%

* Pursuant to a Distribution Plan, the Fund may bear a Rule 12b-1 fee not to exceed 0.25% per year of the Fund’s average daily net assets. However, no such fee is currently paid by the Fund, and the Board of Trustees has not currently approved the commencement of any payments under the Distribution Plan.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, whether you do or do not sell your shares, your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$47	\$148	\$258	\$579

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. For the period from December 9, 2019 (commencement of operations) through March 31, 2020, the Fund’s portfolio turnover rate was 292% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund will invest at least 80% of its total assets in components of the Underlying Index, to-be-announced transactions representing such components, and investment companies that seek to track the performance of a subset of the Underlying Index or of an index that is correlated to one of the three sub-indexes. As of each monthly reconstitution, the Underlying Index will be fully invested in one of the three following sub-indexes: FTSE US Treasury 1-5 Years

Fund Summary

KFA Dynamic Fixed Income ETF

Index; FTSE US Treasury 7-10 Years Index; and FTSE US High-Yield Market BB/B-Rated Capped Custom Index. The FTSE US Treasury 1-5 Years Index includes fixed-rate U.S. Treasury bonds with remaining maturities of 1 to 5 years. The FTSE US Treasury 7-10 Years Index includes fixed-rate U.S. Treasury bonds with remaining maturities of 7 to 10 years. The FTSE High-Yield Market BB/B-Rated Capped Custom Index includes high-yield debt (commonly referred to as “junk bonds”) with remaining maturities of at least one year. The Underlying Index will invest in the sub-index with the highest prior three-month returns as of the time of the monthly reconstitution, accordingly, at times, the Underlying Index may be invested only in the FTSE High-Yield Market BB/B-Rated Capped Custom Index.

The securities eligible for inclusion in the Underlying Index include U.S. Treasuries, traditional bonds that make principal and interest payments in cash, zero-coupon bonds (debt securities that do not pay interest, rather they are issued and trade at a discount and offer full face value at maturity), pay-in-kind (PIK) securities (debt securities that pay interest in additional bonds rather than in cash during an initial period), step-up bonds (debt securities that pay an initial interest rate but also have a feature where set rate increases happen at periodic intervals), and Rule 144A bonds (debt securities that are privately issued) issued by corporations domiciled in the United States or Canada.

The issues that are eligible for inclusion in the Underlying Index, as of each reconstitution, include those that: (1) have a rating from BB+ by S&P Global (“S&P”) or Ba1 by Moody’s Investors Service, Inc. (“Moody’s”) to B- by S&P or B3 by Moody’s for the FTSE High-Yield Market BB/B-Rated Capped Custom Index; and (2) have a minimum issue size of \$5 billion for the FTSE US Treasury 1-5 Years Index or the FTSE US Treasury 7-10 Years Index and \$500 million for the FTSE High-Yield Market BB/B-Rated Capped Custom Index. Underlying Index components are weighted according to the market capitalization, except that the securities of any particular issuer of the FTSE High-Yield Market BB/B-Rated Capped Custom Index will be capped at 2% as of each rebalance of the Underlying Index.

The Fund may invest up to 20% of its assets in instruments that are not included in the Underlying Index, but that the Fund’s subadviser, SkyRock Investment Management, LLC (“SkyRock”) believes will help the Fund track its Underlying Index. These instruments include debt securities not included in the Underlying Index, derivatives (including swaps, forwards, futures, structured notes and options), equity securities and cash and cash equivalents. In addition, the Fund may invest in shares of investment companies, such as exchange traded funds (“ETFs”), unit investment trusts and closed-end investment companies, including to gain exposure to component securities of the Fund’s Underlying Index or when such investments present a more cost efficient alternative to investing directly in the securities. The Fund may also invest in U.S. money market funds or other U.S. cash equivalents. The other investment companies in which the Fund may invest may be advised, sponsored or otherwise serviced by Krane, SkyRock and/or their affiliates. The Fund will not purchase shares of an investment company if it would cause the Fund to (i) own more than 3% of such investment company’s voting shares; (ii) invest more than 5% of its total assets in such investment company; or (iii) invest more than 10% of its total assets in investment companies.

Although the Fund reserves the right to replicate (or hold all components of) the Underlying Index, the Fund expects to use representative sampling to track the Underlying Index. “Representative sampling” is a strategy that involves investing in a representative sample of securities that collectively have an investment profile similar to the Underlying Index.

Fund Summary

KFA Dynamic Fixed Income ETF

As of June 30, 2020, the FTSE US Treasury 1-5 Years Index included 146 issues. As of June 30, 2020, the credit ratings for the rated components in the FTSE US Treasury 1-5 Years Index ranged from AA+ to AA+, as determined by S&P or Moody's. The FTSE US Treasury 1-5 Years Index is rebalanced monthly.

As of June 30, 2020, the FTSE US Treasury 7-10 Years Index included 17 issues. As of June 30, 2020, the credit ratings for the rated components in the FTSE US Treasury 7-10 Years Index ranged from AA+ to AA+, as determined by S&P or Moody's. The FTSE US Treasury 7-10 Years Index is rebalanced monthly.

As of June 30, 2020, the FTSE US High-Yield Market BB/B-Rated Capped Custom Index included 920 issues. As of June 30, 2020, the credit ratings for the rated components in the FTSE US High-Yield Market BB/B-Rated Capped Custom Index ranged from BB+ to B-, as determined by S&P or Moody's. The FTSE US High-Yield Market BB/B-Rated Capped Custom Index is rebalanced monthly.

The Fund is non-diversified.

The Underlying Index is provided by FTSE Russell ("Index Provider"). "FTSE Russell" is a trading name of FTSE International Limited and Frank Russell Company and their respective subsidiary undertakings.

The Fund may engage in securities lending.

Principal Risks

As with all ETFs, a shareholder of the Fund is subject to the risk that his or her investment could lose money. The Fund may not achieve its investment objective and an investment in the Fund is not by itself a complete or balanced investment program. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. An investment in the Fund involves the risk of total loss. In addition to these risks, the Fund is subject to a number of additional principal risks that may affect the value of its shares, including:

Fixed Income Securities Risk. Fixed income securities are subject to credit risk and interest rate risk. Credit risk refers to the possibility that the issuer of a security will not make timely interest payments or repay the principal of the debt issued (i.e., default on its obligations). A downgrade or default on securities held by the Fund could adversely affect the Fund's performance. Generally, the longer the maturity and the lower the credit quality of a security, the more sensitive it is to credit risk. Interest rate risk refers to fluctuations in the value of a debt resulting from changes in the level of interest rates. When interest rates go up, the prices of most debt instruments generally go down; and when interest rates go down, the prices of most debt instruments generally go up. Debt instruments with longer durations tend to be more sensitive to interest rate changes, typically making them more volatile. Interest rates have recently increased and may continue increasing, thereby heightening the risks associated with rising interest rates.

Pay-In-Kind and Step-Up Coupon Securities Risk. A pay-in-kind security pays no interest in cash to its holder during its life. Similarly, a step-up coupon security is a debt security that may not pay interest for a specified period of time and then, after the initial period, may pay interest at a series of different rates. Accordingly, pay-in-kind and step-up coupon securities will be subject to greater fluctuations in market value in response to changing interest rates than debt obligations of comparable maturities that make current, periodic distribution of interest in cash.

Fund Summary

KFA Dynamic Fixed Income ETF

Perpetual Bonds Risk. Perpetual bonds offer a fixed return with no maturity date. Because they never mature, perpetual bonds can be more volatile than other types of bonds that have a maturity date and may be more sensitive to changes in interest rates. If market interest rates rise significantly, the interest rate paid by a perpetual bond may be much lower than the prevailing interest rate. Perpetual bonds are also subject to credit risk with respect to the issuer. In addition, because perpetual bonds may be callable after a set period of time, there is the risk that the issuer may recall the bond, which may require the Fund to reinvest the proceeds in lower yielding securities.

Prepayment and Extension Risk. When interest rates decline, borrowers tend to refinance their loans and the loans that back mortgage-backed and other asset-backed securities suffer a higher rate of prepayment. This could cause a decrease in the Fund's income and share price. Conversely, when interest rates rise, borrowers tend to repay their loans less quickly, which will generally increase the Fund's sensitivity to interest rates and its potential for price declines.

Subordinated Obligations Risk. Payments under some bonds may be structurally subordinated to other existing and future liabilities and obligations of the issuer. Claims of creditors of subordinated debt will have less priority as to the assets of the issuer and its creditors who seek to enforce the terms of the bond. Certain bonds may not contain any restrictions on the ability to incur additional unsecured indebtedness.

High Yield Securities Risk. Securities that are rated below investment grade (or "junk bonds") are subject to greater risk of loss of income and principal than highly rated securities because their issuers may be more likely to default. Junk bonds are inherently speculative. The prices of high yield securities are likely to be more volatile than those of highly rated securities, and the secondary market for them is generally less liquid than that for highly rated securities.

Privately-Issued Securities Risk. The Fund may invest in privately-issued securities, including those that are normally purchased pursuant to Rule 144A or Regulation S promulgated under the Securities Act of 1933, as amended (the "Securities Act"). Privately-issued securities are securities that have not been registered under the Securities Act and as a result are subject to legal restrictions on resale. Privately-issued securities are not traded on established markets and may be less liquid, difficult to value and subject to wide fluctuations in value. Delay or difficulty in selling such securities may result in a loss to the Fund. In addition, transaction costs may be higher for privately-issued securities than for more liquid securities. The Fund may have to bear the expense of registering privately-issued securities for resale and the risk of substantial delays in effecting the registration.

Momentum Risk. Momentum investing entails investing in securities that exhibit persistence in certain performance indicators. These securities may be more volatile than a broad cross-section of securities and momentum may indicate that the performance indicator being measured is peaking. The Fund may experience losses if the price of securities exhibiting momentum stops, turns or otherwise behaves differently than predicted.

Non-Diversified Fund Risk. Because the Fund is non-diversified and may invest a greater portion of its assets in fewer issuers than a diversified fund, changes in the market value of a single portfolio holding could cause greater fluctuations in the Fund's share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a single portfolio holding or a relatively small number of portfolio holdings to have a greater impact on the Fund's performance.

Fund Summary

KFA Dynamic Fixed Income ETF

ETF Risk. As an ETF, the Fund is subject to the following risks:

Authorized Participants Concentration Risk. The Fund has a limited number of financial institutions that may act as Authorized Participants. To the extent they cannot or are otherwise unwilling to engage in creation and redemption transactions with the Fund and no other Authorized Participant steps in, shares of the Fund may trade like closed-end fund shares at a significant discount to NAV and may face delisting from the Exchange.

Premium/Discount Risk. There may be times when the market price of the Fund's shares is more than the NAV intra-day (at a premium) or less than the NAV intra-day (at a discount). As a result, shareholders of the Fund may pay more than NAV when purchasing shares and receive less than NAV when selling Fund shares. This risk is heightened in times of market volatility or periods of steep market declines. In such market conditions, market or stop loss orders to sell Fund shares may be executed at prices well below NAV.

Secondary Market Trading Risk. Investors buying or selling shares in the secondary market will normally pay brokerage commissions, which are often a fixed amount and may be a significant proportional cost for investors buying or selling relatively small amounts of shares. Secondary market trading is subject to bid-ask spreads and trading in Fund shares may be halted by the Exchange because of market conditions or other reasons. If a trading halt occurs, a shareholder may temporarily be unable to purchase or sell shares of the Fund. In addition, although the Fund's shares are listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained or that the Fund's shares will continue to be listed.

Small Fund Risk. The Fund is small and does not yet have a significant number of shares outstanding. Small funds are at greater risk than larger funds of wider bid-ask spreads for its shares, trading at a greater premium or discount to NAV, liquidation and/or a stop to trading.

New Adviser Risk. SkyRock is a newly-formed investment adviser and, therefore, does not have prior experience in providing advisory services.

Liquidity Risk. The Fund's investments are subject to liquidity risk, which exists when an investment is or becomes difficult to purchase or sell at a reasonable time and price. If a transaction is particularly large or if the relevant market is or becomes illiquid, it may not be possible to initiate a transaction or liquidate a position, which may cause the Fund to suffer significant losses and difficulties in meeting redemptions. If a number of securities held by the Fund stop trading, it may have a cascading effect and cause the Fund to halt trading. Volatility in market prices will increase the risk of the Fund being subject to a trading halt.

Passive Investment Risk. There is no guarantee that the Underlying Index will create the desired exposure and the Fund is not actively managed. It does not seek to "beat" the Underlying Index or take temporary defensive positions when markets decline. Therefore, the Fund may purchase or hold securities with current or projected underperformance.

Management Risk. The Fund may not fully replicate the Underlying Index and may hold less than the total number of securities in the Underlying Index. Therefore, the Fund is subject to the risk that SkyRock's security selection process may not produce the intended results.

Tracking Error Risk. The Fund's return may not match or achieve a high degree of correlation with the return of the Underlying Index. This may be due to, among other factors, the Fund holding cash under

Fund Summary

KFA Dynamic Fixed Income ETF

certain circumstances in lieu of Underlying Index securities. To the extent that the Fund employs a representative sampling strategy, the Fund's ability to track the Underlying Index may be adversely affected.

Market Risk. The values of the Fund's holdings could decline generally or could underperform other investments. In addition, there is a risk that policy changes by the U.S. Government, Federal Reserve, and/or other government actors could cause volatility in global financial markets and negative sentiment, which could have a negative impact on the Fund and could result in losses. Geopolitical and other risks, including environmental and public health risks may add to instability in world economies and markets generally. Changes in value may be temporary or may last for extended periods. Further, the Fund is susceptible to the risk that certain investments may be difficult or impossible to sell at a favorable time or price. Market developments may also cause the Fund's investments to become less liquid and subject to erratic price movements.

High Portfolio Turnover Risk. The Fund may incur high turnover rates, which may increase the Fund's brokerage commission costs and negatively impact the Fund's performance. Such portfolio turnover also may generate net short-term capital gains.

Valuation Risk. Independent market quotations for certain investments held by the Fund may not be readily available, and such investments may be fair valued or valued by a pricing service at an evaluated price. These valuations involve subjectivity and different market participants may assign different prices to the same investment. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund. In addition, the securities in which the Fund invests may trade on days that the Fund does not price its shares; as a result, the value of Fund shares may change on days when investors cannot purchase or sell their Fund holdings.

Derivatives Risk. The use of derivatives (including swaps, futures, forwards, structured notes and options) involve risks, such as possible default by a counterparty, potential losses if markets do not move as expected, and the potential for greater losses than if these techniques had not been used. Investments in derivatives may expose the Fund to leverage, which may cause the Fund to be more volatile than if it had not been leveraged. By investing in derivatives, the Fund could lose more than the amount it invests; some derivatives can have the potential for unlimited loss. Derivatives may also be subject to valuation risk, which is the risk that valuation sources for the derivative will not be readily available in the market which is especially possible in times of market distress, during which market participants may be reluctant to purchase complex instruments or provide price quotes for them. In addition, derivatives can be difficult or impossible to sell at the time of and at the price desired by the seller.

Investments in Investment Companies Risk. The Fund may invest in other investment companies, including those advised, sponsored or otherwise serviced by Krane, SkyRock, and/or their affiliates. The Fund will indirectly be exposed to the risks of investments by such funds and will incur its pro rata share of the underlying fund's expenses. Additionally, investments in ETFs are subject to ETF Risk. Krane and SkyRock are subject to conflicts of interest in allocating Fund assets to investment companies that are advised, sponsored or otherwise serviced by Krane, SkyRock and/or their affiliates. To the extent that the Fund invests in investment companies or other pooled investment vehicles that are not registered pursuant to the 1940 Act, it will not enjoy the protections of the U.S. law.

Fund Summary

KFA Dynamic Fixed Income ETF

Securities Lending Risk. To the extent the Fund lends its securities, it may be subject to the following risks: (1) the securities in which the collateral is invested may not perform sufficiently to cover the return collateral payments owed to borrowers; (2) delays may occur in the recovery of securities from borrowers, which could interfere with the Fund's ability to vote proxies or to settle transactions; and (3) although borrowers of the Fund's securities typically provide collateral in the form of cash that is reinvested in securities, there is the risk of possible loss of rights in the collateral should the borrower fail financially.

Cash and Cash Equivalents Risk. The Fund may hold cash or cash equivalents. Generally, such positions offer less potential for gain than other investments. This is particularly true when the market for other investments in which the Fund may invest is rapidly rising. If the Fund holds cash uninvested it will be subject to the credit risk of the depositing institution holding the cash.

Performance Information

Once the Fund has completed a full calendar year of operations, a bar chart and table will be included in this Prospectus that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the variability of the Fund's return to a broad measure of market performance. Once available, the Fund's current performance information will be available at www.kfafunds.com. Past performance does not necessarily indicate how the Fund will perform in the future.

Management

Investment Adviser and Sub-Adviser

Krane Funds Advisors, LLC serves as the investment adviser to the Fund.

SkyRock Investment Management, LLC serves as the sub-adviser to the Fund.

Portfolio Manager

Braxton Wall, Managing Member, Principal and Portfolio Manager of SkyRock has served as portfolio manager for the Fund since its inception in 2019.

Purchase and Sale of Fund Shares

Shares may be purchased and redeemed from the Fund only in "Creation Units" of 50,000 shares, or multiples thereof. As a practical matter, only institutions and large investors, such as market makers or other large broker-dealers, purchase or redeem Creation Units. Most investors will buy and sell shares of the Fund on the Exchange. Individual shares can be bought and sold throughout the trading day like other publicly traded securities through a broker-dealer on the Exchange. These transactions do not involve the Fund. The price of an individual Fund share is based on market prices, which may be different from its NAV. As a result, the Fund's shares may trade at a price greater than the NAV (at a premium) or less than the NAV (at a discount). Most investors will incur customary brokerage commissions and charges when buying or selling shares of the Fund through a broker-dealer.

Tax Information

Fund distributions are generally taxable as ordinary income or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged retirement account, which may be taxable upon withdrawal.

Fund Summary

KFA Dynamic Fixed Income ETF

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your sales person to recommend the Fund over another investment. Ask your sales person or visit your financial intermediary's website for more information.

Fund Summary

KFA Large Cap Quality Dividend Index ETF

Investment Objective

The KFA Large Cap Quality Dividend Index ETF (the “Fund”) seeks to provide investment results that, before fees and expenses, correlate generally to the price and yield performance of a specific equity securities index. The Fund’s current index is the Russell 1000 Dividend Select Equal Weight Index (the “Underlying Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. The table below does not include the brokerage commissions that you may pay when purchasing or selling shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.40%
Distribution and/or Service (12b-1) Fees*	0.00%
Other Expenses	0.02%
Total Annual Fund Operating Expenses	0.42%

* Pursuant to a Distribution Plan, the Fund may bear a Rule 12b-1 fee not to exceed 0.25% per year of the Fund’s average daily net assets. However, no such fee is currently paid by the Fund, and the Board of Trustees has not currently approved the commencement of any payments under the Distribution Plan.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This Example does not reflect any brokerage commissions that you may pay on purchases and sales of your shares. Although your actual costs may be higher or lower, based on these assumptions, whether you do or do not sell your shares, your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$43	\$135	\$235	\$530

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. For the period from June 12, 2019 (commencement of operations) through March 31, 2020, the Fund’s portfolio turnover rate was 72% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund will invest at least 80% of its total assets in components of the Underlying Index. The Underlying Index is designed to track the equity market performance of

Fund Summary

KFA Large Cap Quality Dividend Index ETF

large cap companies that have increased their dividend payments over a period of ten years (subject to certain exceptions), which the Fund believes is a measure of a “quality” company. The Underlying Index is derived from the Russell 1000[®] Index, which is a free float-adjusted, market capitalization weighted index that utilizes a rules-based indexing methodology and includes approximately 1,000 of the largest companies in the Russell 3000[®] Index. The Russell 3000[®] Index represents approximately 98% of the investable U.S. equity market.

To be eligible for inclusion in the Underlying Index as of each annual review, securities must be components of the Russell 1000[®] Index, have had increasing annual per-share regular cash dividends for at least ten consecutive years (subject to certain exceptions) and have had no decrease in quarter-to-quarter dividends per share. On a quarterly basis: (1) the securities with the highest 6- and 12-month risk-adjusted price momentum values are included in the Underlying Index, (2) securities of companies with decreasing quarter-to-quarter dividends are removed from the Underlying Index, and (3) components of the Underlying Index are equal weighted.

The Fund may invest up to 20% of its assets in instruments that are not included in the Underlying Index, but that Krane believes will help the Fund track the Underlying Index. These investments may include equity securities of issuers whose securities are not components of the Underlying Index, derivative instruments (including swaps, futures, forwards, structured notes and options), other investment companies (including ETFs) and cash or cash equivalents (including money market funds). The other investment companies in which the Fund may invest may be advised, sponsored or otherwise serviced by Krane and/or its affiliates.

Although the Fund expects to replicate (or hold all components of) the Underlying Index, the Fund reserves the right to use representative sampling to track the Underlying Index. “Representative sampling” is a strategy that involves investing in a representative sample of securities that collectively have an investment profile similar to the Underlying Index.

The Fund may engage in securities lending.

The Fund is non-diversified. To the extent the Underlying Index is concentrated in a particular industry, the Fund is expected to be concentrated in that industry. As of March 31, 2020, the Underlying Index included 97 securities of companies with a market capitalization range of \$2.5 billion to \$1,199.5 billion and an average market capitalization of \$58.4 billion. The largest sector representations in the Underlying Index were the Industrial sector (23.7%) and the Financial sector (15.2%).

Principal Risks

As with all exchange traded funds (“ETFs”), a shareholder of the Fund is subject to the risk that his or her investment could lose money. The Fund may not achieve its investment objective and an investment in the Fund is not by itself a complete or balanced investment program. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. An investment in the Fund involves the risk of total loss. In addition to these risks, the Fund is subject to a number of additional principal risks that may affect the value of its shares, including:

Concentration Risk. Because the Fund’s assets are expected to be concentrated in an industry or group of industries to the extent that the Underlying Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries or sector. Market conditions, interest rates, and economic, regulatory,

Fund Summary

KFA Large Cap Quality Dividend Index ETF

or financial developments could significantly affect a single industry or a group of related industries, and the securities of companies in that industry or group of industries could react similarly to these or other developments. From time to time, the Fund may invest a significant percentage of its assets in issuers in a single industry (or the same group of industries) or sector of the economy. While the Fund's sector and industry exposure is expected to vary over time based on the composition of the Underlying Index, the Fund is currently subject to the principal risks described below. The Fund may have significant exposure to other industries or sectors over time.

Financials Sector Risk. The performance of companies in the financials sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets. This sector has experienced significant losses in the recent past, and the impact of more stringent capital requirements and of recent or future regulation on any individual financial company or on the sector as a whole cannot be predicted.

Industrials Sector Risk. The industrials sector may be affected by changes in the supply and demand for products and services, product obsolescence, claims for environmental damage or product liability and general economic conditions, among other factors.

Derivatives Risk. The use of derivatives (including swaps, futures, forwards, structured notes and options) may involve leverage, which includes risks that are different from, and greater than, the risks associated with investing directly in a reference asset, because a small investment in a derivative can result in a large impact on the Fund and may cause the Fund to be more volatile. In addition, derivatives can be illiquid and imperfectly correlate with the reference asset, resulting in unexpected returns that could materially adversely affect the Fund. Certain derivatives (such as swaps and options) are bi-lateral agreements that expose the Fund to counterparty risk, which is the risk of loss in the event that the counterparty to an agreement fails to perform under it. In that case, the Fund may suffer losses potentially equal to, or greater than, the full value of the derivative if the counterparty fails to perform its obligations. Counterparty risks are compounded by the fact that there are only a limited number of ways available to invest in certain reference assets and, therefore, there may be few counterparties to swaps or options based on those reference assets. Investments in derivatives may expose the Fund to leverage, which may cause the Fund to be more volatile than if it had not been leveraged. Many derivatives are subject to segregation requirements that require the Fund to segregate the market or notional value of the derivatives, which could impede the portfolio management of the Fund.

Dividend Risk. There is no guarantee that issuers of the stocks held by the Fund will declare dividends in the future or that, if declared, such dividends will remain at current levels or increase over time.

Equity Securities Risk. The values of equity securities are subject to factors such as market fluctuations, changes in interest rates and perceived trends in stock prices. Equity securities are subject to volatile changes in value and their values may be more volatile than other asset classes. In the event of liquidation, equity securities are generally subordinate in rank to debt and other securities of the same issuer.

ETF Risk. As an ETF, the Fund is subject to the following risks:

Authorized Participants Concentration Risk. The Fund has a limited number of financial institutions that may act as Authorized Participants. To the extent they cannot or are otherwise unwilling to engage in creation and redemption transactions with the Fund and no other Authorized Participant steps in, shares of the Fund may trade like closed-end fund shares at a significant discount to net asset value ("NAV") and may face delisting from the Exchange.

Fund Summary

KFA Large Cap Quality Dividend Index ETF

Small Fund Risk. The Fund is small and does not yet have a significant number of shares outstanding. Small funds are at greater risk than larger funds of wider bid-ask spreads for its shares, trading at a greater premium or discount to NAV, liquidation and/or a stop to trading.

Premium/Discount Risk. There may be times when the market price of the Fund's shares is more than the NAV intra-day (at a premium) or less than the NAV intra-day (at a discount). As a result, shareholders of the Fund may pay more than NAV when purchasing shares and receive less than NAV when selling Fund shares. This risk is heightened in times of market volatility or periods of steep market declines. In such market conditions, market or stop loss orders to sell Fund shares may be executed at prices well below NAV.

Secondary Market Trading Risk. Investors buying or selling shares in the secondary market will normally pay brokerage commissions, which are often a fixed amount and may be a significant proportional cost for investors buying or selling relatively small amounts of shares. Secondary market trading is subject to bid-ask spreads and trading in Fund shares may be halted by the Exchange because of market conditions or other reasons. If a trading halt occurs, a shareholder may temporarily be unable to purchase or sell shares of the Fund. In addition, although the Fund's shares are listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained or that the Fund's shares will continue to be listed.

Investment in Investment Companies Risk. When the Fund invests in other investment companies (or funds), it will indirectly be exposed to the risks of such funds' investments. Moreover, the Fund will incur its pro rata share of such funds' expenses. Additionally, investments in ETFs are subject to ETF Risk. Krane is subject to conflicts of interest in allocating Fund assets to investment companies that are advised, sponsored or otherwise serviced by Krane and/or its affiliates.

Large Capitalization Company Risk. Investments in large capitalization companies may go in and out of favor based on market and economic conditions and may underperform other market segments. Some large capitalization companies may be unable to respond quickly to new competitive challenges and attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion. As such, returns on investments in stocks of large capitalization companies could trail the returns on investments in stocks of small and mid capitalization companies.

Management Risk. Because the Fund may not fully replicate the Underlying Index and may hold less than the total number of securities in the Underlying Index, the Fund is subject to management risk. This is the risk that the Krane's security selection process, which is subject to a number of constraints, may not produce the intended results.

Market Risk. The values of the Fund's holdings could decline generally or could underperform other investments. In addition, there is a risk that policy changes by the U.S. Government, Federal Reserve, and/or other government actors could cause volatility in global financial markets and negative sentiment, which could have a negative impact on the Fund and could result in losses. Geopolitical and other risks, including environmental and public health risks may add to instability in world economies and markets generally. Changes in value may be temporary or may last for extended periods. Further, the Fund is susceptible to the risk that certain investments may be difficult or impossible to sell at a favorable time or price. Market developments may also cause the Fund's investments to become less liquid and subject to erratic price movements.

Fund Summary

KFA Large Cap Quality Dividend Index ETF

Momentum Risk. Momentum investing entails investing in securities that exhibit persistence in certain performance indicators. These securities may be more volatile than a broad cross-section of securities and momentum may indicate that the performance indicator being measured is peaking. The Fund may experience losses if the price of securities exhibiting momentum stops, turns or otherwise behaves differently than predicted.

Non-Diversified Fund Risk. Because the Fund is non-diversified and may invest a greater portion of its assets in fewer issuers than a diversified fund, changes in the market value of a single portfolio holding could cause greater fluctuations in the Fund's share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a single portfolio holding or a relatively small number of portfolio holdings to have a greater impact on the Fund's performance.

Passive Investment Risk. The Fund is not actively managed, does not seek to "beat" the Underlying Index and does not take temporary defensive positions when markets decline. Therefore, the Fund may not sell a security due to current or projected underperformance of a security, industry or sector. There is no guarantee that the Underlying Index will create the desired exposure. The Underlying Index may not contain an appropriate mix of securities, but the Fund's investment objective and principal investment strategies impose limits on the Fund's ability to invest in securities not included in the Underlying Index.

Quality Factor Risk. The Fund uses appreciating annual dividends as a measurement of quality. This style of investing is subject to the risk that the past performance of these companies does not continue and that the returns on such securities are less than returns on other styles of investing or the overall stock market. In addition, there may be periods when quality dividend investing is out of favor and during which the investment performance of a fund using a quality dividend strategy may suffer.

Securities Lending Risk. To the extent the Fund lends its securities, it may be subject to the following risks: (1) borrowers of the Fund's securities typically provide collateral in the form of cash that is reinvested in securities; (2) the securities in which the collateral is invested may not perform sufficiently to cover the return collateral payments owed to borrowers; (3) delays may occur in the recovery of securities from borrowers, which could interfere with the Fund's ability to vote proxies or to settle transactions; and (4) there is the risk of possible loss of rights in the collateral should the borrower fail financially.

Tracking Error Risk. The Fund's return may not match or achieve a high degree of correlation with the return of the Underlying Index. This may be due to, among other factors, the Fund holding cash under certain circumstances in lieu of Underlying Index securities, the use of representative sampling strategy, if applicable, asset valuation differences, tax considerations, the unavailability of securities in the Underlying Index from time to time and other liquidity constraints.

Valuation Risk. Independent market quotations for certain investments held by the Fund may not be readily available, and such investments may be fair valued or valued by a pricing service at an evaluated price. These valuations involve subjectivity and different market participants may assign different prices to the same investment. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund.

Cash and Cash Equivalents Risk. The Fund may hold cash or cash equivalents. Generally, such positions offer less potential for gain than other investments. Holding cash or cash equivalents, even strategically, may lead to missed investment opportunities. This is particularly true when the market for other investments in which the Fund may invest is rapidly rising. If the Fund holds cash uninvested it will be subject to the credit risk of the depositing institution holding the cash.

Fund Summary

KFA Large Cap Quality Dividend Index ETF

Performance Information

Once the Fund has completed a full calendar year of operations, a bar chart and table will be included in this Prospectus that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the variability of the Fund's return to a broad measure of market performance. Once available, the Fund's current performance information will be available at www.kfafunds.com. Past performance does not necessarily indicate how the Fund will perform in the future.

Management

Investment Adviser

Krane Funds Advisors, LLC ("Krane" or "Adviser") serves as the investment adviser to the Fund.

Portfolio Managers

James Maund, Head of Capital Markets at the Adviser, has served as the lead portfolio manager of the Fund since January 2020. Jonathan Shelon, Chief Operating Officer of the Adviser, supports Mr. Schlarbaum and Krane's investment team for the Fund and has been a portfolio manager of the Fund since the Fund's inception in June 2019.

Purchase and Sale of Fund Shares

Shares may be purchased and redeemed from the Fund only in "Creation Units" of 50,000 shares, or multiples thereof. As a practical matter, only institutions and large investors, such as market makers or other large broker-dealers, purchase or redeem Creation Units. Most investors will buy and sell shares of the Fund on the Exchange. Individual shares can be bought and sold throughout the trading day like other publicly traded securities through a broker-dealer on the Exchange. These transactions do not involve the Fund. The price of an individual Fund share is based on market prices, which may be different from its NAV. As a result, the Fund's shares may trade at a price greater than the NAV (at a premium) or less than the NAV (at a discount). Most investors will incur customary brokerage commissions and charges when buying or selling shares of the Fund through a broker-dealer.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged retirement account, which may be taxable upon withdrawal.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your sales person to recommend the Fund over another investment. Ask your sales person or visit your financial intermediary's website for more information.

Fund Summary

KFA Small Cap Quality Dividend Index ETF

Investment Objective

The KFA Small Cap Quality Dividend Index ETF (the “Fund”) seeks to provide investment results that, before fees and expenses, correlate generally to the price and yield performance of a specific equity securities index. The Fund’s current index is the Russell 2000 Dividend Select Equal Weight Index (the “Underlying Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. The table below does not include the brokerage commissions that you may pay when purchasing or selling shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.50%
Distribution and/or Service (12b-1) Fees*	0.00%
Other Expenses	0.02%
Total Annual Fund Operating Expenses	0.52%

* Pursuant to a Distribution Plan, the Fund may bear a Rule 12b-1 fee not to exceed 0.25% per year of the Fund’s average daily net assets. However, no such fee is currently paid by the Fund, and the Board of Trustees has not currently approved the commencement of any payments under the Distribution Plan.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. This Example does not reflect any brokerage commissions that you may pay on purchases and sales of your shares. Although your actual costs may be higher or lower, based on these assumptions, whether you do or do not sell your shares, your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$53	\$167	\$291	\$653

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. For the period from June 12, 2019 (commencement of operations) through March 31, 2020, the Fund’s portfolio turnover rate was 59% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund will invest at least 80% of its total assets in components of the Underlying Index. The Underlying Index is designed to track the equity market performance of

Fund Summary

KFA Small Cap Quality Dividend Index ETF

small cap companies that have increased their dividend payments over a period of ten years (subject to certain exceptions), which the Fund believes is a measure of a “quality” company. The Underlying Index is derived from the Russell 2000[®] Index, which is a free float-adjusted, market capitalization weighted index that utilizes a rules-based indexing methodology and includes approximately 2,000 of the smallest companies in the Russell 3000[®] Index. The Russell 3000[®] Index represents approximately 98% of the investable U.S. equity market.

To be eligible for inclusion in the Underlying Index as of annual review, securities must be components of the Russell 2000[®] Index, have had increasing annual per-share regular cash dividends for at least ten consecutive years (subject to certain exceptions) and have had no decrease in quarter-to-quarter dividends per share. On a quarterly basis: (1) the securities with the highest 6- and 12-month risk-adjusted price momentum values are included in the Underlying Index, (2) securities of companies with decreasing quarter-to-quarter dividends are removed from the Underlying Index, and (3) components of the Underlying Index are equal weighted.

The Fund may invest up to 20% of its assets in instruments that are not included in the Underlying Index, but that Krane believes will help the Fund track the Underlying Index. These investments may include equity securities of issuers whose securities are not components of the Underlying Index, derivative instruments (including swaps, futures, forwards, structured notes and options), other investment companies (including ETFs) and cash or cash equivalents (including money market funds). The other investment companies in which the Fund may invest may be advised, sponsored or otherwise serviced by Krane and/or its affiliates.

Although the Fund expects to replicate (or hold all components of) the Underlying Index, the Fund reserves the right to use representative sampling to track the Underlying Index. “Representative sampling” is a strategy that involves investing in a representative sample of securities that collectively have an investment profile similar to the Underlying Index.

The Fund may engage in securities lending.

The Fund is non-diversified. To the extent the Underlying Index is concentrated in a particular industry, the Fund is expected to be concentrated in that industry. As of March 31, 2020, the Underlying Index included 45 securities of companies with a market capitalization range of \$348 million to \$4.2 billion and an average market capitalization of \$1.9 billion. The largest sector representations in the Underlying Index were the Utilities sector (22.7%), the Industrial sector (20.8%) and the Financial sector (14.3%).

Principal Risks

As with all exchange traded funds (“ETFs”), a shareholder of the Fund is subject to the risk that his or her investment could lose money. The Fund may not achieve its investment objective and an investment in the Fund is not by itself a complete or balanced investment program. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. An investment in the Fund involves the risk of total loss. In addition to these risks, the Fund is subject to a number of additional principal risks that may affect the value of its shares, including:

Concentration Risk. Because the Fund’s assets are expected to be concentrated in an industry or group of industries to the extent that the Underlying Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries or sector. Market conditions, interest rates, and economic, regulatory,

Fund Summary

KFA Small Cap Quality Dividend Index ETF

or financial developments could significantly affect a single industry or a group of related industries, and the securities of companies in that industry or group of industries could react similarly to these or other developments. From time to time, the Fund may invest a significant percentage of its assets in issuers in a single industry (or the same group of industries) or sector of the economy. While the Fund's sector and industry exposure is expected to vary over time based on the composition of the Underlying Index, the Fund is currently subject to the principal risks described below. The Fund may have significant exposure to other industries or sectors over time.

Financials Sector Risk. The performance of companies in the financials sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets. This sector has experienced significant losses in the recent past, and the impact of more stringent capital requirements and of recent or future regulation on any individual financial company or on the sector as a whole cannot be predicted.

Industrials Sector Risk. The industrials sector may be affected by changes in the supply and demand for products and services, product obsolescence, claims for environmental damage or product liability and general economic conditions, among other factors.

Utilities Sector Risk. The utilities sector is subject to significant government regulation and oversight. Companies in the utilities sector may be adversely affected due to increases in commodity and operating costs, rising costs of financing capital construction and the cost of complying with government regulations, among other factors.

Derivatives Risk. The use of derivatives (including swaps, futures, forwards, structured notes and options) may involve leverage, which includes risks that are different from, and greater than, the risks associated with investing directly in a reference asset, because a small investment in a derivative can result in a large impact on the Fund and may cause the Fund to be more volatile. In addition, derivatives can be illiquid and imperfectly correlate with the reference asset, resulting in unexpected returns that could materially adversely affect the Fund. Certain derivatives (such as swaps and options) are bi-lateral agreements that expose the Fund to counterparty risk, which is the risk of loss in the event that the counterparty to an agreement fails to perform under it. In that case, the Fund may suffer losses potentially equal to, or greater than, the full value of the derivative if the counterparty fails to perform its obligations. Counterparty risks are compounded by the fact that there are only a limited number of ways available to invest in certain reference assets and, therefore, there may be few counterparties to swaps or options based on those reference assets. Investments in derivatives may expose the Fund to leverage, which may cause the Fund to be more volatile than if it had not been leveraged. Many derivatives are subject to segregation requirements that require the Fund to segregate the market or notional value of the derivatives, which could impede the portfolio management of the Fund.

Dividend Risk. There is no guarantee that issuers of the stocks held by the Fund will declare dividends in the future or that, if declared, such dividends will remain at current levels or increase over time.

Equity Securities Risk. The values of equity securities are subject to factors such as market fluctuations, changes in interest rates and perceived trends in stock prices. Equity securities are subject to volatile changes in value and their values may be more volatile than other asset classes. In the event of liquidation, equity securities are generally subordinate in rank to debt and other securities of the same issuer.

Fund Summary

KFA Small Cap Quality Dividend Index ETF

ETF Risk. As an ETF, the Fund is subject to the following risks:

Authorized Participants Concentration Risk. The Fund has a limited number of financial institutions that may act as Authorized Participants. To the extent they cannot or are otherwise unwilling to engage in creation and redemption transactions with the Fund and no other Authorized Participant steps in, shares of the Fund may trade like closed-end fund shares at a significant discount to net asset value (“NAV”) and may face delisting from the Exchange.

Small Fund Risk. The Fund is small and does not yet have a significant number of shares outstanding. Small funds are at greater risk than larger funds of wider bid-ask spreads for its shares, trading at a greater premium or discount to NAV, liquidation and/or a stop to trading.

Premium/Discount Risk. There may be times when the market price of the Fund's shares is more than the NAV intra-day (at a premium) or less than the NAV intra-day (at a discount). As a result, shareholders of the Fund may pay more than NAV when purchasing shares and receive less than NAV when selling Fund shares. This risk is heightened in times of market volatility or periods of steep market declines. In such market conditions, market or stop loss orders to sell Fund shares may be executed at prices well below NAV.

Secondary Market Trading Risk. Investors buying or selling shares in the secondary market will normally pay brokerage commissions, which are often a fixed amount and may be a significant proportional cost for investors buying or selling relatively small amounts of shares. Secondary market trading is subject to bid-ask spreads and trading in Fund shares may be halted by the Exchange because of market conditions or other reasons. If a trading halt occurs, a shareholder may temporarily be unable to purchase or sell shares of the Fund. In addition, although the Fund's shares are listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained or that the Fund's shares will continue to be listed.

Investment in Investment Companies Risk. When the Fund invests in other investment companies (or funds), it will indirectly be exposed to the risks of such funds' investments. Moreover, the Fund will incur its pro rata share of such funds' expenses. Additionally, investments in ETFs are subject to ETF Risk. Krane is subject to conflicts of interest in allocating Fund assets to investment companies that are advised, sponsored or otherwise serviced by Krane and/or its affiliates.

Liquidity Risk. The Fund's investments are subject to liquidity risk, which exists when an investment is or becomes difficult to purchase or sell at a reasonable time and price. If a transaction is particularly large or if the relevant market is or becomes illiquid, it may not be possible to initiate a transaction or liquidate a position, which may cause the Fund to suffer significant losses and difficulties in meeting redemptions. If a number of securities held by the Fund stop trading, it may have a cascading effect and cause the Fund to halt trading. Volatility in market prices will increase the risk of the Fund being subject to a trading halt.

Momentum Risk. Momentum investing entails investing in securities that exhibit persistence in certain performance indicators. These securities may be more volatile than a broad cross-section of securities and momentum may indicate that the performance indicator being measured is peaking. The Fund may experience losses if the price of securities exhibiting momentum stops, turns or otherwise behaves differently than predicted.

Fund Summary

KFA Small Cap Quality Dividend Index ETF

Management Risk. Because the Fund may not fully replicate the Underlying Index and may hold less than the total number of securities in the Underlying Index, the Fund is subject to management risk. This is the risk that the Krane's security selection process, which is subject to a number of constraints, may not produce the intended results.

Market Risk. The values of the Fund's holdings could decline generally or could underperform other investments. In addition, there is a risk that policy changes by the U.S. Government, Federal Reserve, and/or other government actors could cause volatility in global financial markets and negative sentiment, which could have a negative impact on the Fund and could result in losses. Geopolitical and other risks, including environmental and public health risks may add to instability in world economies and markets generally. Changes in value may be temporary or may last for extended periods. Further, the Fund is susceptible to the risk that certain investments may be difficult or impossible to sell at a favorable time or price. Market developments may also cause the Fund's investments to become less liquid and subject to erratic price movements.

Non-Diversified Fund Risk. Because the Fund is non-diversified and may invest a greater portion of its assets in fewer issuers than a diversified fund, changes in the market value of a single portfolio holding could cause greater fluctuations in the Fund's share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a single portfolio holding or a relatively small number of portfolio holdings to have a greater impact on the Fund's performance.

Passive Investment Risk. The Fund is not actively managed, does not seek to "beat" the Underlying Index and does not take temporary defensive positions when markets decline. Therefore, the Fund may not sell a security due to current or projected underperformance of a security, industry or sector. There is no guarantee that the Underlying Index will create the desired exposure. The Underlying Index may not contain an appropriate mix of securities, but the Fund's investment objective and principal investment strategies impose limits on the Fund's ability to invest in securities not included in the Underlying Index.

Quality Factor Risk. The Fund uses appreciating annual dividends as a measurement of quality. This style of investing is subject to the risk that the past performance of these companies does not continue and that the returns on such securities are less than returns on other styles of investing or the overall stock market. In addition, there may be periods when quality dividend investing is out of favor and during which the investment performance of a fund using a quality dividend strategy may suffer.

Small- and Mid-Capitalization Company Risk. Investing in the securities of small- and mid-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger capitalization companies and more established companies. Since small- and mid-sized companies may have limited operating histories, product lines and financial resources, the securities of these companies may lack sufficient market liquidity and can be sensitive to expected changes in interest rates, borrowing costs and earnings.

Securities Lending Risk. To the extent the Fund lends its securities, it may be subject to the following risks: (1) borrowers of the Fund's securities typically provide collateral in the form of cash that is reinvested in securities; (2) the securities in which the collateral is invested may not perform sufficiently to cover the return collateral payments owed to borrowers; (3) delays may occur in the recovery of securities from borrowers, which could interfere with the Fund's ability to vote proxies or to settle transactions; and (4) there is the risk of possible loss of rights in the collateral should the borrower fail financially.

Fund Summary

KFA Small Cap Quality Dividend Index ETF

Tracking Error Risk. The Fund's return may not match or achieve a high degree of correlation with the return of the Underlying Index. This may be due to, among other factors, the Fund holding cash under certain circumstances in lieu of Underlying Index securities, the use of representative sampling strategy, if applicable, asset valuation differences, tax considerations, the unavailability of securities in the Underlying Index from time to time and other liquidity constraints.

Valuation Risk. Independent market quotations for certain investments held by the Fund may not be readily available, and such investments may be fair valued or valued by a pricing service at an evaluated price. These valuations involve subjectivity and different market participants may assign different prices to the same investment. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund.

Cash and Cash Equivalents Risk. The Fund may hold cash or cash equivalents. Generally, such positions offer less potential for gain than other investments. Holding cash or cash equivalents, even strategically, may lead to missed investment opportunities. This is particularly true when the market for other investments in which the Fund may invest is rapidly rising. If the Fund holds cash uninvested it will be subject to the credit risk of the depositing institution holding the cash.

Performance Information

Once the Fund has completed a full calendar year of operations, a bar chart and table will be included in this Prospectus that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the variability of the Fund's return to a broad measure of market performance. Once available, the Fund's current performance information will be available at www.kfafunds.com. Past performance does not necessarily indicate how the Fund will perform in the future.

Management

Investment Adviser

Krane Funds Advisors, LLC ("Krane" or "Adviser") serves as the investment adviser to the Fund.

Portfolio Managers

James Maund, Head of Capital Markets at the Adviser, has served as the lead portfolio manager of the Fund since January 2020. Jonathan Shelon, Chief Operating Officer of the Adviser, supports Mr. Schlarbaum and Krane's investment team for the Fund and has been a portfolio manager of the Fund since the Fund's inception in June 2019.

Purchase and Sale of Fund Shares

Shares may be purchased and redeemed from the Fund only in "Creation Units" of 50,000 shares, or multiples thereof. As a practical matter, only institutions and large investors, such as market makers or other large broker-dealers, purchase or redeem Creation Units. Most investors will buy and sell shares of the Fund on the Exchange. Individual shares can be bought and sold throughout the trading day like other publicly traded securities through a broker-dealer on the Exchange. These transactions do not involve the Fund. The price of an individual Fund share is based on market prices, which may be different from its NAV. As a result, the Fund's shares may trade at a price greater than the NAV (at a premium) or less than the NAV (at a discount). Most investors will incur customary brokerage commissions and charges when buying or selling shares of the Fund through a broker-dealer.

Fund Summary

KFA Small Cap Quality Dividend Index ETF

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged retirement account, which may be taxable upon withdrawal.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your sales person to recommend the Fund over another investment. Ask your sales person or visit your financial intermediary's website for more information.

Additional Information About the Funds

Each of the policies described in this Prospectus, including each Fund's investment objective and/or 80% policy, is a non-fundamental policy that may be changed by the Board of Trustees of the Trust without shareholder approval, but each Fund will provide 60 days' prior written notice to shareholders (if it has any) of any change in its 80% policy. Certain fundamental policies of the Funds are set forth in the SAI.

The Funds seek to have a tracking error relative to the performance of their respective Underlying Indexes of less than five percent on an annualized basis.

Underlying Indexes

KFA Dynamic Fixed Income Index ETF ("KDFI")

As of each monthly reconstitution, the Underlying Index will be fully invested in one of the three following sub-indexes: FTSE US Treasury 1-5 Years Index; FTSE US Treasury 7-10 Years Index; and FTSE High-Yield Market BB/B-Rated Capped Custom Index. The FTSE US Treasury 1-5 Years Index includes fixed-rate U.S. Treasury bonds with remaining maturities of 1 to 5 years. The FTSE US Treasury 7-10 Years Index includes fixed-rate U.S. Treasury bonds with remaining maturities of 7 to 10 years. The FTSE High-Yield Market BB/B-Rated Capped Custom Index includes high-yield debt with remaining maturities of at least one year. The Underlying Index will invest in the sub-index with the highest prior three-month returns as of the time of the monthly reconstitution, accordingly, at times, the Underlying Index may be invested only in the FTSE High-Yield Market BB/B-Rated Capped Custom Index.

The securities eligible for inclusion in the Underlying Index include U.S. Treasuries, traditional bonds that make principal and interest payments in cash, zero-coupon bonds (debt securities that do not pay interest, rather they are issued and trade at a discount and offer full face value at maturity), pay-in-kind (PIK) securities (debt securities that pay interest in additional bonds rather than in cash during an initial period), step-up bonds (debt securities that pay an initial interest rate but also have a feature where set rate increases happen at periodic intervals), and Rule 144A bonds (debt securities that are privately issued) issued by corporations domiciled in the United States or Canada. Federal Reserve purchases, inflation-indexed Treasury securities and STRIPS are excluded from the Underlying Index.

The issues that are eligible for inclusion in the Underlying Index, as of each reconstitution, include those that: (1) have a rating from BB+ by S&P Global ("S&P") or Ba1 by Moody's Investors Service, Inc. ("Moody's") to B- by S&P or B3 by Moody's for the FTSE High-Yield Market BB/B-Rated Capped Custom Index; and (2) have a minimum issue size of \$5 billion for the FTSE US Treasury 1-5 Years Index or the FTSE US Treasury 7-10 Years Index and \$500 million for the FTSE High-Yield Market BB/B-Rated Capped Custom Index. Underlying Index components are weighted according to the market capitalization, except that the securities of any particular issuer of the FTSE High-Yield Market BB/B-Rated Capped Custom Index will be capped at 2% as of each rebalance of the Underlying Index.

The Underlying Index is provided by FTSE Russell ("Index Provider"). "FTSE Russell" is a trading name of FTSE International Limited and Frank Russell Company and their respective subsidiary undertakings. The Index Provider is not affiliated with the Fund or Krane. The Index Provider determines the components and the relative weightings of the component securities in the Underlying Index. Additional information about the Underlying Index is available on the Index Provider's website, www.ftse.com.

Additional Information About the Funds

KFA Large Cap Quality Dividend Index ETF (“KLCD”)

The Underlying Index is designed to track the equity market performance of large cap companies that have increased their dividend payments over a period of ten years (subject to certain exceptions). The Underlying Index is derived from the Russell 1000[®] Index, which is a free float-adjusted, market capitalization weighted index that utilizes a rules-based indexing methodology and includes approximately 1,000 of the largest companies in the Russell 3000[®] Index. The Russell 3000[®] Index represents approximately 98% of the investable U.S. equity market.

To be eligible for inclusion in the Underlying Index as of each annual review, securities must be components of the Russell 1000[®] Index, have had increasing annual per-share regular cash dividends for at least ten consecutive years (subject to certain exceptions) and have had no decrease in quarter-to-quarter dividends per share. When there are fewer than 40 constituents eligible for inclusion in the Underlying Index, eligible securities with at least nine years of increasing dividends are added in descending order of dividend yield, until the total number of constituents is 40. If there are still fewer than 40 index constituents, eligible securities with at least eight years of increasing dividends are added to the constituent list. If there are still fewer than 40 constituents, no further additions are made.

On a quarterly basis: (1) companies with decreasing quarter-to-quarter dividends are removed from the Underlying Index, (2) the highest ranking companies based on momentum are included in the Underlying Index, based on a security's 6 month and 12 month risk-adjusted price momentum values, where risk-adjusted price momentum is defined as the cumulative local daily price return over the relevant time period divided by the annualized standard deviation of weekly local price returns (Wednesday to Wednesday) over the trailing 3 years, and (3) after ranking the momentum score in descending order within each industry, the bottom 50% within each industry are dropped from the Underlying Index and only the top 50% within each industry remain, but the total number of stocks in the Underlying Index is less than 40, a higher percentage of stocks (>50%) within each industry will be selected to target a total number of stocks of 40.

The Underlying Index was launched on April 5, 2019, with a base date of March 20, 1998, and a base value of 1,000. As of March 31, 2020, the Underlying Index included 97 securities of companies with a market capitalization range of \$2.5 billion to \$1,199.5 billion and an average market capitalization of \$58.4 billion. The largest sector representations in the Underlying Index were the Industrial sector (23.7%) and the Financial sector (15.2%). The foregoing are subject to change. While the component and weights of the Underlying Index are modified quarterly per the above, in certain circumstances, the Underlying Index may continue to include a security no longer meeting the Underlying Index's eligibility criteria to reduce turnover.

The Underlying Index is provided by FTSE Russell (“Index Provider”), “FTSE Russell” is a trading name of FTSE International Limited (“FTSE”) and Frank Russell Company (“Russell”) and their respective subsidiary undertakings. The Index Provider is not affiliated with the Fund or Krane. The Index Provider determines the components and the relative weightings of the component securities in the Underlying Index. Additional information about the Underlying Index is available on the Index Provider's website, www.ftse.com.

Additional Information About the Funds

KFA Small Cap Quality Dividend Index ETF (“KSCD”)

The Underlying Index is designed to track the equity market performance of small cap companies that have increased their dividend payments over a period of ten years (subject to certain exceptions). The Underlying Index is derived from the Russell 2000® Index, which is a free float-adjusted, market capitalization weighted index that utilizes a rules-based indexing methodology and includes approximately 2,000 of the smallest companies in the Russell 3000® Index. The Russell 3000® Index represents approximately 98% of the investable U.S. equity market.

To be eligible for inclusion in the Underlying Index as of each reconstitution, securities must be components of the Russell 2000® Index, have had increasing annual per-share regular cash dividends for at least ten consecutive years (subject to certain exceptions) and have had no decrease in quarter-to-quarter dividends per share. When there are fewer than 40 constituents eligible for inclusion in the Underlying Index, eligible securities with at least nine years of increasing dividends are added in descending order of dividend yield, until the total number of constituents is 40. If there are still fewer than 40 index constituents, eligible securities with at least eight years of increasing dividends are added to the constituent list. If there are still fewer than 40 constituents, no further additions are made.

On a quarterly basis: (1) companies with decreasing quarter-to-quarter dividends are removed from the Underlying Index, (2) the highest ranking companies based on momentum are included in the Underlying Index, based on a security's 6 month and 12 month risk-adjusted price momentum values, where risk-adjusted price momentum is defined as the cumulative local daily price return over the relevant time period divided by the annualized standard deviation of weekly local price returns (Wednesday to Wednesday) over the trailing 3 years, and (3) after ranking the momentum score in descending order within each industry, the bottom 50% within each industry are dropped from the Underlying Index and only the top 50% within each industry remain, but the total number of stocks in the Underlying Index is less than 40, a higher percentage of stocks (>50%) within each industry will be selected to target a total number of stocks of 40.

The Underlying Index was launched on April 5, 2019, with a base date of March 20, 1998, and a base value of 1,000. As of March 31, 2020, the Underlying Index included 45 securities of companies with a market capitalization range of \$348 million to \$4.2 billion and an average market capitalization of \$1.9 billion. The largest sector representations in the Underlying Index were the Utilities sector (22.7%), the Industrial sector (20.8%) and the Financial sector (14.3%). The foregoing are subject to change. While the component and weights of the Underlying Index are modified quarterly per the above, in certain circumstances, the Underlying Index may continue to include a security no longer meeting the Underlying Index's eligibility criteria to reduce turnover.

The Underlying Index is provided by FTSE Russell (“Index Provider”), “FTSE Russell” is a trading name of FTSE International Limited (“FTSE”) and Frank Russell Company (“Russell”) and their respective subsidiary undertakings. The Index Provider is not affiliated with the Fund or Krane. The Index Provider determines the components and the relative weightings of the component securities in the Underlying Index. Additional information about the Underlying Index is available on the Index Provider's website, www.ftse.com.

Additional Information About the Funds

Investment Risks

The following section provides additional information regarding certain of the risks of investing in a Fund. An investment in a Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. An investment in a Fund involves a risk of a total loss. There is no guarantee that a Fund will meet its investment objective.

“X” denotes a principal investment risk; “*” denotes a non-principal investment risk.

Cash and Cash Equivalents Risk. The Fund may hold cash or cash equivalents. Generally, such positions offer less potential for gain than other investments. Holding cash or cash equivalents, even strategically, may lead to missed investment opportunities. This is particularly true when the market for other investments in which the Fund may invest is rapidly rising. If the Fund holds cash uninvested it will be subject to the credit risk of the depositing institution holding the cash.

Additional Information About the Funds

Concentration Risk. Because the Fund's assets are expected to be concentrated in an industry or group of industries, to the extent that the Underlying Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries. Market conditions, interest rates, and economic, regulatory, or financial developments could significantly affect a single industry or a group of related industries, and the securities of companies in that industry or group of industries could react similarly to these or other developments.

Consumer Goods Sector Risk. The consumer goods sector may be strongly affected by social trends, marketing campaigns and other factors affecting consumer demand. Governmental regulation affecting the use of various food additives may affect the profitability of certain companies. In addition, tobacco companies may be adversely affected by new laws, regulations and litigation. Many consumer goods in the U.S. may also be marketed globally, and such consumer goods companies may be affected by the demand and market conditions in non-U.S. countries.

Consumer Services Sector Risk. The consumer services sector may be affected by changes in the domestic and international economy, exchange and interest rates, competition, consumers' disposable income, consumer preferences, social trends and marketing campaigns.

Derivatives Risk. Derivatives are financial instruments, such as swaps, futures, forwards, structured notes and options, whose values are based on the value of one or more reference assets, such as a security, asset, currency, interest rate or index. Derivatives involve risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments. For example, derivatives involve the risk of mispricing or improper valuation and the risk that changes in the value of a derivative may not correlate perfectly with the reference asset(s). Derivative transactions can create investment leverage, which implicates risks greater than those associated with investing directly in a reference asset, because a small investment in a derivative can result in a large impact on the Fund and may cause the Fund to be more volatile.

Many derivative transactions are entered into "over-the-counter" (not on an exchange or contract market); as a result, the value of such a derivative transaction will depend on the ability and the willingness of the Fund's counterparty to perform its obligations under the transaction. If a counterparty were to default on its obligations, the Fund's contractual remedies against such counterparty may be subject to bankruptcy and insolvency laws, which could affect the Fund's rights as a creditor (e.g., the Fund may not receive the net amount of payments that it is contractually entitled to receive). A liquid secondary market may not always exist for the Fund's derivative positions at any time. If a derivative transaction is centrally cleared, it will be subject to the rules of the clearing exchange and subject to risks associated with the exchange.

Derivatives can be illiquid and imperfectly correlate with the reference asset(s), resulting in unexpected returns that could materially adversely affect the Fund. Some derivatives can have the potential for unlimited loss. Many derivatives are subject to segregation requirements, pursuant to which the Fund must segregate the market or notional value of the derivatives and which could impede the portfolio management of the Fund. It is possible that developments in the derivatives market, including ongoing or potential government regulation, could adversely affect the Fund's ability to enter into new derivatives agreements, terminate existing derivative agreements or to realize amounts to be received under such instruments.

Additional Information About the Funds

Counterparty Risk. Because many derivatives are an obligation of the counterparty rather than a direct investment in the reference asset, the Fund may suffer losses potentially equal to, or greater than, the full value of the derivative if the counterparty fails to perform its obligations under the derivative agreement as a result of bankruptcy or otherwise. Any loss would result in a reduction in the NAV of the Fund and will likely impair the Fund's ability to achieve its investment objective. If there are only a few potential counterparties, the Fund, subject to applicable law, may enter into swap, option or other derivative transactions with as few as one counterparty at any time.

Forward Currency Contracts Risk. A forward foreign currency contract involves a negotiated obligation to purchase or sell a specific currency at a future date (with or without delivery required), which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward foreign currency contracts are not traded on exchanges; rather, a bank or dealer will act as agent or as principal in order to make or take future delivery, exposing the Fund to counterparty risk.

Futures Risk. In addition to the above, risks associated with the use of futures contracts include the following: (i) an imperfect correlation between movements in prices of futures contracts and movements in the value of the reference asset(s) it is designed to simulate; and (ii) the possibility of an illiquid secondary market for a futures contract and the resulting inability to close a position prior to its maturity date. When the Fund purchases or sells a futures contract, it is subject to daily variation margin calls that could be substantial. If the Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous.

Leveraging Risk. The Fund's investment in derivative instruments provide leveraged exposure. The Fund's investment in these instruments generally requires a small investment relative to the amount of investment exposure assumed. As a result, such investments may give rise to losses that exceed the amount invested in those instruments. The use of derivatives may expose the Fund to potentially dramatic losses (or gains) in the value of a derivative or other financial instrument and, thus, in the value the Fund's portfolio. The cost of investing in such instruments generally increases as interest rates increase, which will lower the Fund's return.

Options Risk. An option is a contract that gives the purchaser (holder) of the option, in return for a premium, the right to buy from (call) or sell to (put) the seller (writer) of the option the security or currency underlying the option at a specified exercise price at any time during the term of the option (normally not exceeding nine months). The writer of an option has the obligation upon exercise of the option to deliver the underlying security or currency upon payment of the exercise price or to pay the exercise price upon delivery of the underlying security or currency. Options are derivatives, which, as described above, can be illiquid, can imperfectly correlate with the reference asset(s), and are subject to segregation requirements.

Options on Futures Contracts Risk. An option on a futures contract provides the holder with the right to enter into a "long" position in the underlying futures contract, in the case of a call option, or a "short" position in the underlying futures contract in the case of a put option, at a fixed exercise price to a stated expiration date. Upon exercise of the option by the holder, the contract market clearing house establishes a corresponding short position for the writer of the option, in the case of a call option, or a corresponding long position, in the case of a put option. Options are derivatives, which, as described above, can be illiquid, can imperfectly correlate with the reference asset(s), and are subject to segregation requirements.

Additional Information About the Funds

Swaps Risk. Swap transactions generally do not involve delivery of reference instruments or payment of the notional amount of the contract. Accordingly, the risk of loss with respect to swaps generally is limited to the net amount of payments that the Fund is contractually obligated to make or, in the case of the other party to a swap defaulting, the net amount of payments that the Fund is contractually entitled to receive. Swaps are of limited duration and there is no guarantee that swaps entered into with a counterparty will continue indefinitely. Accordingly, the duration of a swap depends on, among other things, the ability of the Fund to renew the expiration period of the relevant swap at agreed upon terms.

Dividend Risk. Companies that issue dividend-yielding securities are not required to continue to pay dividends on such securities. There is no guarantee that issuers of the securities held by the Fund will declare dividends in the future or that, if declared, such dividends will remain at current levels or increase over time.

Equity Securities Risk. Equity securities are subject to volatile changes in value that may be attributable to market perception of a particular issuer or to general stock market fluctuations that affect all issuers. Investments in equity securities are subject to volatile changes in market value and their values may be more volatile than investments in other asset classes. In the event of liquidation, equity securities are generally subordinate in rank to debt and other securities of the same issuer.

ETF Risk. As an ETF, the Fund is subject to the following risks:

Authorized Participants Concentration Risk. The Fund has a limited number of financial institutions that may act as Authorized Participants. To the extent they cannot or are otherwise unwilling to engage in creation and redemption transactions with the Fund and no other Authorized Participant steps in, shares of the Fund may trade like closed-end fund shares at a significant discount to NAV and may face delisting from the Exchange.

Premium/Discount Risk. The NAV of the Fund's shares will generally fluctuate with changes in the market value of the Fund's securities holdings. The market prices of Fund shares will generally fluctuate in accordance with changes in the Fund's NAV and supply and demand of shares on the secondary market. It cannot be predicted whether Fund shares will trade below (at a discount), at or above (at a premium) their NAV. As a result, shareholders of the Fund may pay more than NAV when purchasing shares and receive less than NAV when selling Fund shares. This risk is heightened in times of market volatility or periods of steep market declines. In such market conditions, market or stop-loss orders to sell Fund shares may be executed at market prices that are significantly below NAV. Price differences may be due, in part, to the fact that supply and demand forces at work in the secondary trading market for shares may be closely related to, but not identical to, the same forces influencing the prices of the securities of the Underlying Index trading individually. The market prices of Fund shares may deviate significantly from the NAV of the shares during periods of market volatility or if the Fund's holdings are or become more illiquid. Disruptions to creations and redemptions may result in trading prices that differ significantly from the Fund's NAV. In addition, market prices of Fund shares may deviate significantly from the NAV if the number of Fund shares outstanding is smaller or if there is less active trading in Fund shares. Investors purchasing and selling Fund shares in the secondary market may not experience investment results consistent with those experienced by those creating and redeeming directly with the Fund.

Secondary Market Trading Risk. Investors buying or selling shares in the secondary market will normally pay brokerage commissions, which are often a fixed amount and may be a significant proportional cost for investors buying or selling relatively small amounts of shares. In addition,

Additional Information About the Funds

secondary market investors will incur the cost of the difference between the price that an investor is willing to pay for shares (the bid price) and the price at which an investor is willing to sell shares (the ask price). This difference in bid and ask prices is often referred to as the “spread” or “bid-ask spread.” The bid-ask spread, which increases the cost of purchasing and selling Fund shares, varies over time for shares based on trading volume and market liquidity, and is generally lower if the Fund’s shares have more trading volume and market liquidity and higher if the Fund’s shares have little trading volume and market liquidity. Increased market volatility may cause increased bid-ask spreads.

Although Fund shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained or that the Fund’s shares will continue to be listed. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in shares is subject to trading halts caused by extraordinary market volatility pursuant to Exchange “circuit breaker” rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of any Fund will continue to be met or will remain unchanged or that the shares will trade with any volume, or at all.

ETF Risk - Small Fund Risk. The Fund is small and does not yet have a significant number of shares outstanding. Small funds are at greater risk than larger funds of wider bid-ask spreads for its shares, trading at a greater premium or discount to NAV, liquidation and/or a trading halt. The Fund also is subject to the continued listing standards of the Exchange, with which the Fund must comply in order to continue being listed on the Exchange. Among other requirements, the continued listing standards require a minimum number of shareholders.

Financials Sector Risk. Companies in the financials sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financials sector may be adversely affected by increases in interest rates. The profitability of companies in the financials sector may be adversely affected by loan losses, which usually increase in economic downturns. In addition, the financials sector in certain countries is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework, which may have an impact on the issuers included in the Fund. Furthermore, increased government involvement in the financials sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund’s investments in financial institutions.

Fixed Income Securities Risk. The value of the Fund’s investments in fixed income securities will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned indirectly by the Fund. On the other hand, if rates fall, the value of the fixed income securities generally increases. The Fund may be subject to a greater risk of rising interest rates due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives. Below are several specific risks associated with investments in fixed income securities.

Call Risk. If interest rates fall, it is possible that issuers of callable securities with high interest coupons will “call” (or prepay) their bonds before their maturity date. If an issuer exercised such a call during a period of declining interest rates, the Fund may have to replace such called security with a lower yielding security. If that were to happen, the Fund’s net investment income could fall.

Additional Information About the Funds

Credit Risk. Credit risk refers to the possibility that the issuer of a security will not be able to make payments of interest and principal when due. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of an investment in that issuer. The degree of credit risk depends on both the financial condition of the issuer and the terms of the obligation.

Event Risk. Event risk is the risk that an unexpected event could interfere with an issuer's ability to make timely interest or principal payments or that causes market speculation about the issuer's ability to make such payments. As a result, the credit quality and market value of an issuer's bonds and/or other debt securities may decline significantly.

Income Risk. The Fund's income may decline due to falling interest rates. During a period of falling interest rates, income risk is generally higher for short term bond funds, moderate for intermediate term bond funds and low for long term bond funds. Therefore, investors should expect a Fund's income to fluctuate accordingly.

Interest Rate Risk. Interest rate risk is the risk that the securities in the Fund's portfolio will decline in value because of increases in market interest rates. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than debt securities with shorter durations. Duration is a measure of a fixed income security's sensitivity to changes in interest rates. For every 1% change in interest rates, a bond's price generally changes approximately 1% in the opposite direction for every year of duration. For example, if a portfolio of fixed income securities has an average weighted duration of three years, its value can be expected to fall about 3% if interest rates rise by 1%. Conversely, the portfolio's value can be expected to rise approximately 3% if interest rates fall by 1%. Unlike maturity, which considers only the date on which the final repayment of principal will be made, duration takes account of interim payments made during the life of the security. Duration is typically not equal to maturity. Interest rates have recently been historically low but have recently increased and may continue to increase, potentially quickly and significantly, thereby heightening the Fund's exposure to the risks associated with rising rates. The Fund may take steps to attempt to reduce the exposure of its portfolio to interest rate changes; however, there can be no guarantee that the Fund will take such actions or that the Fund will be successful in reducing the impact of interest rate changes on the portfolio. Changes in government intervention may have adverse effects on investments, volatility, and illiquidity in debt markets.

Issuer Risk. There may be economic or political changes that impact the ability of issuers to repay principal and to make interest payments on securities. Changes to the financial condition or credit rating of issuers may also adversely affect the value of the Fund's securities.

Maturity Risk. The value of the Fund's fixed income investments is also dependent on their maturity. Generally, the longer the maturity of a fixed income security, the greater its sensitivity to changes in interest rates.

Pay-In-Kind and Step-Up Coupon Securities Risk. A pay-in-kind security pays no interest in cash to its holder during its life. Similarly, a step-up coupon security is a debt security that may not pay interest for a specified period of time and then, after the initial period, may pay interest at a series of different rates. Accordingly, pay-in kind and step-up coupon securities will be subject to greater fluctuations in market value in response to changing interest rates than debt obligations of comparable maturities that make current, periodic distribution of interest in cash.

Additional Information About the Funds

Perpetual Bonds Risk. Perpetual bonds offer a fixed return with no maturity date. Because they never mature, perpetual bonds can be more volatile than other types of bonds that have a maturity date and may be more sensitive to changes in interest rates. If market interest rates rise significantly, the interest rate paid by a perpetual bond may be much lower than the prevailing interest rate. Perpetual bonds are also subject to credit risk with respect to the issuer. In addition, because perpetual bonds may be callable after a set period of time, there is the risk that the issuer may recall the bond, which may require the Fund to reinvest the proceeds in lower yielding securities.

Subordinated Obligations Risk. Payments under some debt may be structurally subordinated to other existing and future liabilities and obligations of an issuer of debt. Claims of creditors of subordinated debt will have less priority as to the assets of the issuer and its creditors who seek to enforce the terms of the debt. Certain debt may not contain any restrictions on the ability of the issuers to incur additional unsecured indebtedness.

Variable and Floating Rate Securities Risk. During periods of increasing interest rates, changes in the coupon rates of variable or floating rate securities may lag behind the changes in market rates or may have limits on the maximum increases in coupon rates. Alternatively, during periods of declining interest rates, the coupon rates on such securities will typically readjust downward resulting in a lower yield. Floating rate notes are generally subject to legal or contractual restrictions on resale, may trade infrequently, and their value may be impaired when the Fund needs to liquidate such securities.

High Portfolio Turnover Risk. The Fund may incur high turnover rates. This may increase the Fund's brokerage commission costs. The performance of the Fund could be negatively impacted by the increased brokerage commission costs incurred by the Fund. Rapid portfolio turnover also exposes shareholders to a higher current realization of net short-term capital gains, distributions of which would generally be taxed to you as ordinary income and thus cause you to pay higher taxes.

High Yield and Unrated Securities Risk. Securities that are unrated or rated below investment grade (or "junk bonds") are subject to greater risk of loss of income and principal (e.g., default) than rated securities, particularly highly rated securities. Junk bonds are inherently speculative. The prices of unrated and high yield securities are generally more sensitive to adverse economic changes and individual issuer developments than highly rated securities. Also, the secondary market for such securities may be less liquid than the markets for rated and/or higher quality securities. As a result, during periods of economic uncertainty, their prices may be more volatile, which may cause the net asset value of the Fund to fluctuate.

Industrials Sector Risk. The industrials sector includes companies engaged in the manufacture and distribution of capital goods, such as those used in defense, construction and engineering, companies that manufacture and distribute electrical equipment and industrial machinery and those that provide commercial and transportation services and supplies. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. Government regulation may in particular affect the aerospace and defense companies, which rely to a significant extent on government demand for their products and services. Transportation companies, another component of the industrials sector, are subject to sharp price movements resulting from changes in the economy, fuel prices, labor agreements and insurance costs.

Investments in Investment Companies Risk. The Fund may purchase shares of investment companies, such as ETFs, unit investment trusts, closed-end investment companies and foreign investment companies, including those that are advised, sponsored or otherwise serviced by Krane and/or

Additional Information About the Funds

its affiliates, to gain exposure to particular component securities of the Underlying Index or when such investments present a more cost efficient alternative to investing directly in securities. When the Fund invests in an investment company, in addition to directly bearing the expenses associated with its own operations, it will bear a pro rata portion of the underlying fund's expenses. An investor in the Fund may receive taxable gains as a result of an underlying fund's portfolio transactions in addition to the taxable gains attributable to the Fund's transactions in shares of the underlying fund. Further, in part because of these additional expenses, the performance of an investment company may differ from the performance the Fund would achieve if it invested directly in the underlying investments of the investment company. In addition, while the risks of owning shares of an investment company generally reflect the risks of owning the underlying investments of the investment company, the Fund may be subject to additional or different risks than if the Fund had invested directly in the underlying investments. For example, shares of an ETF are traded at market prices, which may vary from the NAV of its underlying investments. Also, the lack of liquidity in an ETF can contribute to the increased volatility of its value in comparison to the value of the underlying portfolio securities. To the extent that the Fund invests in investment companies or other pooled investment vehicles that are not registered pursuant to the 1940 Act, including foreign investment companies, it will not enjoy the protections of the 1940 Act. In addition, to the extent the Fund invests in other investment companies, including ETFs, sponsored, advised or otherwise serviced by Krane, its sub-adviser, as applicable, or their affiliates, they may be subject to conflicts of interest in allocating Fund assets, particularly if they are paid an advisory fee both by the Fund and the fund in which the Fund invests.

Large Capitalization Company Risk. Investments in large capitalization companies may go in and out of favor based on market and economic conditions and may underperform other market segments. Some large capitalization companies may be unable to respond quickly to new competitive challenges and attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion. As such, returns on investments in stocks of large capitalization companies could trail the returns on investments in stocks of small and mid capitalization companies.

Liquidity Risk. The Fund's investments are subject to liquidity risk, which exists when an investment is or becomes difficult to purchase or sell at a reasonable time and price. If a transaction is particularly large or if the relevant market is or becomes illiquid, it may reduce the potential returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price, which may cause the Fund to suffer significant losses and difficulties in meeting redemptions. This is especially true given the limited number of market participants in certain markets in which the Fund may invest. Certain countries in which the Fund may invest may be subject to extended settlement delays and/or foreign holidays, during which the Fund will unlikely be able to convert such holdings to cash and may make it additionally difficult for the Fund to meet redemptions in a timely fashion.

Market developments may cause the Fund's investments to become less liquid and subject to erratic price movements, and may also cause the Fund to encounter difficulties in timely honoring redemptions, especially if market events cause an increased incidence of shareholder redemptions. If a number of securities held by the Fund stop trading or become illiquid, it may have a cascading effect and cause the Fund to halt trading. Volatility in market prices will increase the risk of the Fund being subject to a trading halt.

Additional Information About the Funds

To the extent that an investment is deemed to be an illiquid investment or a less liquid investment, a Fund can expect to be exposed to greater liquidity risk.

Management Risk. To the extent the Fund may not fully replicate the Underlying Index and may hold less than the total number of securities in the Underlying Index, the Fund is subject to management risk. This is the risk that Krane or its sub-adviser's, as applicable, security selection process, which is subject to a number of constraints, may not produce the intended results. Alternatively, to the extent Krane or its sub-adviser, as applicable, determines to manage the Fund by replicating the Underlying Index, it is likely to experience higher portfolio turnover and brokerage costs, which erode performance.

Market Risk. The values of the Fund's holdings could decline generally or could underperform other investments. Market fluctuations could be caused by such factors as economic and political developments, changes in interest rates and perceived trends in securities prices. Recent developments in relations between the United States and its trading partners have heightened concerns of increased tariffs and restrictions on trade between the U.S. and other countries. An increase in tariffs or trade restrictions, or even the threat of such developments, could lead to a significant reduction in international trade, which could have a negative impact on the world's export industry and a commensurately negative impact on financial markets. Different types of securities tend to go through cycles of outperformance and under-performance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Therefore, the Fund is susceptible to the risk that certain holdings may be difficult or impossible to sell at a favorable time or price.

Turbulence in the financial markets and reduced liquidity in equity, credit and fixed-income markets may negatively affect issuers worldwide, which could have an adverse effect on the Fund. The Federal Reserve and other domestic and foreign government agencies may attempt to stabilize the global economy. These actions may expose markets to heightened volatility and may reduce liquidity for certain Fund investments, causing the value of the Fund's investments and share price to decline. To the extent that the Fund experiences high redemptions because of these actions, the Fund may experience increased portfolio turnover, which will increase the costs that the Fund incurs and will lower the Fund's performance.

Geopolitical risks, including terrorism, tensions or open conflict between nations, or political or economic dysfunction within some nations that are major players on the world stage or major producers of oil, may lead to overall instability in world economies and markets generally and have led, and may in the future lead, to increased market volatility and may have adverse long-term effects. Similarly, environmental and public health risks, such as natural disasters or pandemics/epidemics, or widespread fear that such events may occur, may impact markets adversely and cause market volatility in both the short- and long-term.

Certain illnesses spread rapidly and have the potential to significantly and adversely affect the global economy. Epidemics and/or pandemics have and may further result in, among other things, closing borders, enhanced health screenings, healthcare service preparation and delivery, quarantines, cancellations, disruptions to supply chains and customer activity, as well as general concern and uncertainty. The impact of such epidemics and/or pandemics that may arise in the future, have the potential to affect the economies of many nations, individual companies and the global securities and commodities markets, including liquidity, in ways that cannot necessarily be foreseen at the present time. The impact of infectious diseases in developing or emerging market countries may be

Additional Information About the Funds

greater due to less established health care systems. Health crises caused by the recent coronavirus outbreak may exacerbate other preexisting political, social and economic risks in certain countries. The impact of the outbreak may be short term or may last for an extended period of time and may have material adverse impacts on a Fund.

New Adviser Risk. SkyRock is a newly-formed investment adviser and, therefore, does not have prior experience in providing advisory services.

Non-Diversified Fund Risk. Because the Fund is non-diversified and may invest a greater portion of its assets in fewer issuers than a diversified fund, changes in the market value of a single portfolio holding could cause greater fluctuations in the Fund's share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a single portfolio holding or a relatively small number of portfolio holdings to have a greater impact on the Fund's performance.

Operational and Cybersecurity Risk. A Fund, Krane, sub-adviser, if applicable, and their service providers and your ability to transact with a Fund may be negatively impacted due to operational matters arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow an unauthorized party to gain access to fund assets, customer data, or proprietary information, or cause a Fund or its service providers, as well as the securities trading venues and their service provides, to suffer data corruption or lose operational functionality. It is not possible for Krane or the other Fund service providers to identify all of the cybersecurity or other operational risks that may affect a Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects.

Passive Investment Risk. The Fund is not actively managed, does not seek to "beat" the Underlying Index, and does not take temporary positions when markets decline. Therefore, the Fund may not sell a security due to current or projected underperformance of a security, industry or sector. If a specific security is removed from the Underlying Index, the Fund may be forced to sell such security at an inopportune time or for a price other than the security's current market value. It is expected that the value of Fund shares will decline, more or less, in correspondence with any decline in value of the Underlying Index. The Underlying Index may not contain the appropriate mix of securities for any particular economic cycle, and the timing of movements from one type of security to another in seeking to track the Underlying Index could have a negative effect on the Fund. However, the Fund's investment objective and principal investment strategies impose limits on the Fund's ability to invest in securities not included in the Underlying Index. There is no guarantee that the Underlying Index will create the desired exposure.

Unlike an actively managed fund, the Fund does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, the Fund's performance could be lower than other types of registered investment companies that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline. To the extent the Fund employs a representative sampling approach, it will hold a smaller number of securities than are in the Underlying Index. As a result, an adverse development to an issuer of securities that the Fund holds could result in a greater decline in NAV than would be the case if the Fund held more of the securities in the Underlying Index.

Privately-Issued Securities Risk. The Fund may invest in privately-issued securities, including those that are normally purchased pursuant to Rule 144A or Regulation S promulgated under the Securities Act. Privately-issued securities are securities that have not been registered under the Securities Act

Additional Information About the Funds

and as a result are subject to legal restriction on resale. They typically may be resold only to “qualified institutional buyers,” in a privately negotiated transaction, to a limited number of purchasers or in limited quantities after they have been held for a specified period of time and other conditions are met for an exemption from registration. Because they are not traded on established markets and there may be relatively few potential purchasers for such securities, especially under adverse market or economic conditions or in the event of adverse changes in the financial condition of the issuer, the Fund may find it more difficult to sell such securities when it may be advisable to do so or it may be able to sell such securities only at prices lower than if such securities were more widely held and traded. At times, privately-issued securities may be less liquid, subject to wide fluctuations in value, and may be more difficult to determine the fair value of such securities for purposes of computing the Fund’s NAV, due to the absence of an active trading market. There can be no assurance that a privately-issued security that is deemed to be liquid when purchased will continue to be liquid for as long as it is held by the Fund, and its value may decline as a result or cause the Fund difficulty in meeting shareholder redemptions. The Fund may have to bear the expense of registering privately-issued securities for resale and the risk of substantial delays in effecting the registration.

Quality Factor Risk. The Fund uses appreciating annual dividends as a measurement of quality. This style of investing is subject to the risk that the past performance of these companies does not continue and that the returns on such securities are less than returns on other styles of investing or the overall stock market. In addition, there may be periods when quality dividend investing is out of favor and during which the investment performance of a fund using a quality dividend strategy may suffer.

Securities Lending Risk. The Fund may lend its portfolio securities to brokers, dealers and financial institutions to seek income. There is a risk that a borrower may default on its obligations to return loaned securities. There is a risk that the assets of the Fund’s securities lending agent may be insufficient to satisfy any contractual indemnification requirements to that Fund. Borrowers of the Fund’s securities typically provide collateral in the form of cash that is reinvested. The Fund will be responsible for the risks associated with the investment of cash collateral, including any collateral invested in a money market fund. The Fund may lose money on its investment of cash collateral or may fail to earn sufficient income on its investment to meet obligations to the borrower. In addition, delays may occur in the recovery of securities from borrowers, which could interfere with the Fund’s ability to vote proxies or to settle transactions and there is the risk of possible loss of rights in the collateral should the borrower fail financially. Krane and its sub-adviser, if applicable, are subject to potential conflicts of interest because the compensation paid to them increases in connection with any net income received by the Fund from a securities lending program.

Small- and Mid-Capitalization Company Risk. Investing in the securities of small- and mid-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger capitalization companies and more established companies. Since small- and medium-sized companies may have limited operating histories, product lines and financial resources, the securities of these companies may lack sufficient market liquidity and can be sensitive to expected changes in interest rates, borrowing costs and earnings. These companies’ securities may be more volatile and less liquid than those of more established companies, and they may be more sensitive to market conditions.

Tracking Error Risk. Tracking error refers to the risk that the Fund’s performance may not match or correlate to that of its Underlying Index, either on a daily or aggregate basis. Tracking error may cause the Fund’s performance to be less than expected. There are a number of factors that may

Additional Information About the Funds

contribute to the Fund's tracking error, such as Fund expenses, imperfect correlation between the Fund's investments and those of the Underlying Index, the use of representative sampling strategy, if applicable, asset valuation differences, tax considerations, the unavailability of securities in the Underlying Index from time to time, holding cash and cash equivalents, and other liquidity constraints. In addition, securities included in the Underlying Index may be suspended from trading. To the extent the Fund calculates its NAV based on fair value prices and the value of the Underlying Index is based on securities' closing prices on local foreign markets, the Fund's ability to track the Underlying Index may be adversely affected. Mathematical compounding may prevent the Fund from correlating with the monthly, quarterly, annual or other period performance of its Underlying Index. In addition, the Fund may not invest in certain securities and other instruments included in the Underlying Index, or invest in them in the exact proportions they represent of the Underlying Index, including due to legal restrictions or limitations imposed by a foreign government or a lack of liquidity in certain securities. Moreover, the Fund may be delayed in purchasing or selling securities and other instruments included in the Underlying Index. Any issues the Fund encounters with regard to currency convertibility (including the cost of borrowing funds, if any) and repatriation may also increase the Fund's tracking error.

Utilities Sector Risk. Companies in the utilities industry may have difficulty obtaining an adequate return on invested capital, raising capital, and financing large construction programs during periods of inflation or unsettled capital markets; face restrictions on operations and increased cost and delays attributable to environmental considerations and regulation; find that existing plants, equipment or products have been rendered obsolete by technological innovations; and be subject to increased costs because of the scarcity of certain fuels or the effects of man-made disasters. Deregulation is subjecting utility companies to greater competition and may adversely affect profitability. As deregulation allows utility companies to diversify outside of their original geographic regions and their traditional lines of business, utility companies may engage in riskier ventures. Government regulators monitor and control utility operations, revenues and costs, and therefore may limit utility profits. Regulatory authorities may also restrict utility companies' access to new markets, thereby diminishing these companies' long-term prospects. Energy conservation and changes in climate policy may have a significant adverse impact on the revenues and expenses of utility companies.

Valuation Risk. Financial information about the Fund's portfolio holdings may not always be reliable, which may make it difficult to obtain a current price for the investments held by the Fund. Independent market quotations for such investments may not be readily available, such as on days during which a security does not trade or a foreign holiday, and securities may be fair valued or valued by a pricing service at an evaluated price. These valuations are subjective and different funds may assign different fair values to the same investment. Such valuations also may be different from what would be produced if the security had been valued using market quotations. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund. Additionally, Fund securities that are valued using techniques other than market quotations, including "fair valued" securities, may be subject to greater fluctuations in their value from one day to the next. Because securities in which the Fund invests may trade on days when the Fund does not price its shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.

Management

Investment Adviser

Krane Funds Advisors, LLC (“Krane” or “Adviser”), which is a UN PRI signatory, is a registered investment adviser located at 280 Park Avenue, 32nd Floor, New York, NY 10017 and serves as investment adviser of each Fund. Krane has served as the investment adviser of each Fund since its inception.

Under the Investment Advisory Agreement between the Trust and Krane, Krane is responsible for reviewing, supervising and administering each Fund’s investment program and the general management and administration of the Trust. In this regard, among other things, Krane arranges for transfer agency, custody, fund administration and accounting, and other non-distribution related services necessary for each Fund to operate. Krane may engage a subadviser to assist it in managing a Fund’s investments, but will be responsible for overseeing any subadvisers. Krane manages each Fund’s business affairs, provides office facilities and equipment and certain clerical, bookkeeping and administrative services, and permits its officers and employees to serve as officers or Trustees of the Trust. Under the Investment Advisory Agreement, Krane bears all of its own costs associated with providing advisory services to the Funds. In addition, Krane has contractually agreed to pay all operating expenses of each Fund, except (i) interest and taxes (including, but not limited to, income, excise, transaction, transfer and withholding taxes); (ii) expenses of the Fund incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions and short sale dividend or interest expense; (iii) expenses incurred in connection with any distribution plan adopted by the Trust in compliance with Rule 12b-1 under the 1940 Act, including distribution fees; (iv) Acquired Fund Fees and Expenses; (v) litigation expenses; (vi) the compensation payable to the Adviser under the investment advisory agreement; (vii) compensation and expenses of the Independent Trustees (including any Trustees’ counsel fees); and (viii) any expenses determined to be extraordinary expenses by the Board. Nevertheless, there exists a risk that a Trust service provider will seek recourse against the Trust if is not timely paid by Krane for the fees and expenses for which it is responsible, which could materially adversely affect a Fund.

Under the Investment Advisory Agreement, each Fund pays Krane the fee shown in the table below (in addition to the securities lending compensation Krane receives under the Agreement discussed below), which is calculated daily and paid monthly, at an annual rate based on a percentage of the average daily net assets of the Fund.

KFA Dynamic Fixed Income ETF	0.45%
KFA Large Cap Quality Dividend Index ETF.	0.40%
KFA Small Cap Quality Dividend Index ETF	0.50%

The Investment Advisory Agreement has been approved by the Board of Trustees and shareholders of each Fund (in this regard, Krane as the sole initial shareholder of the applicable Funds approved various matters and agreements, including the Investment Advisory Agreement for each Fund prior to its public offering).

Management

For the fiscal year or period, as applicable, ended March 31, 2020, the Adviser received the fees (in addition to the securities lending compensation Krane receives under the Agreement discussed below), as a percentage of average daily net assets of each operational Fund, as set forth below, which is net of any fees waiver or expenses reimbursed:

KFA Dynamic Fixed Income ETF	0.45%
KFA Large Cap Quality Dividend Index ETF	0.40%
KFA Small Cap Quality Dividend Index ETF	0.50%

In addition to the above-described services, to the extent a Fund engages in securities lending, Krane will: (i) determine which securities are available for loan and notify the securities lending agent for the Fund (the “Agent”), (ii) monitor the Agent’s activities to ensure that securities loans are effected in accordance with Krane’s instructions and in accordance with applicable procedures and guidelines adopted by the Board, (iii) make recommendations to the Board regarding the Fund’s participation in securities lending; (iv) prepare appropriate periodic reports for, and seek appropriate periodic approvals from, the Board with respect to securities lending activities, (v) respond to Agent inquiries concerning Agent’s activities, and (vi) such other related duties as Krane deems necessary or appropriate.

Under the agreement, while the fees and expenses related to a Fund’s securities lending-related activities reduce the revenues and income of the Fund from such activities, they are not fees and expenses for which Krane is responsible. Further, as compensation for the services provided by Krane in connection with any securities lending-related activities, each Fund pays Krane 10% of the monthly investment income received from the investment of cash collateral and loan fees received from borrowers in respect of securities loans (net of any amounts paid to the custodian and/or securities lending agent or rebated to borrowers). For the fiscal period ended March 31, 2020, Krane did not receive any revenue from the Funds related to securities lending activities.

A discussion regarding the basis for the Board’s approval of the investment advisory agreement with Krane with respect to the KFA Large Cap Quality Dividend Index ETF and KFA Small Cap Quality Dividend Index ETF is available in the Funds’ Semi-Annual Report to Shareholders dated September 30, 2019. A discussion regarding the basis for the Board’s approval of the investment advisory agreement with Krane with respect to the KFA Dynamic Fixed Income ETF is available in the Funds’ Annual Report to Shareholders dated March 31, 2020.

China International Capital Corporation (USA) Holdings Inc., a wholly-owned, indirect subsidiary of China International Capital Corporation Limited owns a majority stake in Krane. As of March 31, 2020 Central Huijin Investment Limited, a mainland Chinese-domiciled entity, held approximately 44.32% of the shares of China International Capital Corporation Limited. Central Huijin Investment Limited is a wholly-owned subsidiary of China Investment Corporation, which is a mainland Chinese sovereign wealth fund. KFA One Holdings, LLC, located at 280 Park Avenue, 32nd Floor, New York, NY 10017, holds the remaining equity interests in Krane and Jonathan Krane, through his equity interests in KFA One Holdings, LLC, beneficially owns more than 10% of the equity interests in Krane.

Krane has received “manager of managers” exemptive relief from the SEC that permits Krane, subject to the approval of the Board of Trustees, to appoint a “wholly-owned” or unaffiliated sub-adviser, as defined in the exemptive relief, or to change the terms of a sub-advisory agreement with a “wholly-owned” or unaffiliated sub-adviser without first obtaining shareholder approval. The exemptive order further permits Krane to add or to change a “wholly-owned” or unaffiliated sub-adviser or to change the fees paid to such parties from time to time without the expense and delays associated

Management

with obtaining shareholder approval of the change and to disclose sub-advisers' fees only in the aggregate in its registration statement. Any increase in the aggregate advisory fee paid by any Fund remains subject to shareholder approval. Krane continues to have ultimate responsibility (subject to oversight by the Board of Trustees) to oversee the sub-advisers and recommend their hiring, termination, and replacement. The Fund will notify shareholders of any change of a Fund sub-adviser.

Investment Sub-Advisers

KFA Dynamic Fixed Income ETF

SkyRock Investment Management, LLC ("SkyRock" or "Sub-Adviser"), located at 4242 Six Forks R, Suite 820, Raleigh, North Carolina, 27609, serves as the sub-adviser of the Fund. SkyRock is responsible for the day-to-day investment management of the Fund, subject to the supervision of Krane and the Board of Trustees.

A discussion regarding the basis for the Board's approval of the Fund's sub-advisory agreement with SkyRock will be available in the Fund's Annual Report to Shareholders dated March 31, 2020.

SkyRock was established in 2019 and, as of the date of this Prospectus, provides advisory services to only the Fund.

Portfolio Managers

KFA Large Cap Quality Dividend Index ETF and KFA Small Cap Quality Dividend Index ETF

James Maund, Head of Capital Markets at the Adviser, has served as the lead portfolio manager of each Fund since January 2020. He joined the Adviser in 2020 and has over 15 years of experience in the investment management industry. Previously, he was a Vice President in the Institutional ETF Group and a member of the ETF Capital Markets Group at State Street Global Advisors (2010-2019); and an ETF trader at Goldman Sachs & Co (2005-2010). Mr. Maund graduated with a bachelor's degree in economics from Wesleyan University.

Jonathan Shelon, Chief Operating Officer of the Adviser, also serves as a portfolio manager of each Fund and supports Mr. Schlarbaum and Krane's investment team with respect to each Fund. Mr. Shelon has been a portfolio manager of each Fund since the Funds' inception in June 2019. Mr. Shelon joined Krane in 2015 as a Managing Partner. Mr. Shelon has spent the majority of his career managing investment portfolios and diverse teams at leading asset management organizations. Prior to joining Krane, he was the Chief Investment Officer of a 40-person global Specialized Strategies Team at J.P. Morgan with \$40 billion AUM. Prior to joining J.P. Morgan, Mr. Shelon spent ten years as a portfolio manager at Fidelity Investments where he was responsible for the investment performance, process and evolution of their target-date strategies for retirement savings, college savings and income generation.

Additional information about the Portfolio Managers' compensation, other accounts managed by the Portfolio Managers and the Portfolio Managers' ownership of Fund shares is available in the SAI.

KFA Dynamic Fixed Income ETF

Braxton Wall, Managing Member, Principal and Portfolio Manager of SkyRock, has served as the portfolio manager of the Fund since its commencement of operations. Mr. Wall has 11 years of experience in fixed income trading and is an owner and registered representative of Falcon Square, a broker-dealer specializing in fixed-income trading. At Falcon Square he covers institutional fixed

Management

income accounts specializing in high yield and investment grade corporate bonds, municipal bonds, agencies, and CMBS. Prior to Falcon Square, Mr. Wall worked at Carolina Capital Markets (2008-2013) in institutional fixed income sales & trading and supervised the Office of Supervisory Jurisdiction (OSJ) for the firm's Raleigh branch. Mr. Wall received a B.A. of Economics from the University of North Carolina—Chapel Hill in 2008. He holds Series 7, 24, 53, and 63 licenses.

Additional information about the Portfolio Manager's compensation, other accounts managed by the Portfolio Manager and the Portfolio Manager's ownership of Fund shares is available in the SAI.

Other Service Providers

SEI Investments Global Funds Services ("Administrator") serves as administrator for the Fund. The Administrator provides necessary administrative and accounting services for the maintenance and operations of the Trust and the Fund, and makes available the office space, equipment, personnel and facilities required to provide such services.

SEI Investments Distribution Co. ("Distributor"), an affiliate of the Administrator, serves as the Fund's distributor. Shares in less than Creation Units are not distributed by the Distributor, and the Distributor does not maintain a secondary market in the shares of the Fund.

Brown Brothers Harriman & Co. ("BBH") serves as custodian and transfer agent for the Fund. BBH maintains in separate accounts cash, securities and other assets of the Fund, keeps all necessary accounts and records, and provides other services.

Shareholder Information

Calculating NAV

Each Fund calculates its NAV by:

- Taking the current market value of its total assets
- Subtracting any liabilities and withholdings (if any)
- Dividing that amount by the total number of shares owned by the shareholders

Each Fund normally calculates NAV as of the regularly scheduled close of normal trading on each day that the NYSE is scheduled to be open for business (a “Business Day”) (normally, 4:00 p.m., Eastern time). Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

In calculating the values of each Fund’s portfolio securities, securities listed on a securities exchange, market or automated quotation system for which quotations are readily available (except for securities traded on NASDAQ), including securities traded over the counter, are valued at the last reported sale price on the primary exchange or market (foreign or domestic) on which they are traded (or at the time as of which the Fund’s NAV is calculated if a security’s exchange is normally open at that time). If there is no such reported sale, such securities are valued at the most recently reported bid price. For securities traded on NASDAQ, the NASDAQ Official Closing Price will be used. If available, debt securities are priced based upon valuations provided by independent, third-party pricing agents. Such values generally reflect the last reported sales price if the security is actively traded. The third-party pricing agents may also value debt securities at an evaluated bid price by employing methodologies that utilize actual market transactions, broker-supplied valuations, or other methodologies designed to identify the market value for such securities. Debt obligations with remaining maturities of sixty days or less may be valued at their amortized cost, which approximates market value. The prices for foreign securities are reported in local currency and converted to U.S. dollars using currency exchange rates. The value of a swap contract is equal to the obligation (or rights) under the swap contract, which will generally be equal to the net amounts to be paid or received under the contract based upon the relative values of the positions held by each party to the contract as determined by the applicable independent, third party pricing agent. Exchange-traded options are valued at the last reported sales price on the exchange on which they are listed. If there is no such reported sale on the valuation date, long positions are valued at the most recent bid price, and short positions are valued at the most recent ask price. OTC options are valued based upon prices determined by the applicable independent, third party pricing agent. Futures are valued at the settlement price established by the board of trade on which they are traded. Foreign currency forward contracts are valued at the current day’s interpolated foreign exchange rate, as calculated using the current day’s spot rate and the 30-, 60-, 90- and 180-day forward rates provided by an Independent Pricing Agent. The exchange rates used for valuation are captured as of the close of the London Stock Exchange each day normally at 4:00 p.m. Greenwich Mean Time. Prices for most securities held by a Fund are provided daily by independent pricing agents. If a security price cannot be obtained from an independent, third-party pricing agent, the Fund seeks to obtain bid and ask prices from two broker-dealers who make a market in the portfolio instrument and determines the average of the two.

Shareholder Information

Investments in open-end investment companies that do not trade on an exchange are valued at the end of day NAV per share. Investments in open-end investment companies that trade on an exchange are valued at the last reported sale price or official closing price as of the close of the customary trading session on the exchange where the security is principally traded. If there is no such reported sale, such securities are valued at the most recently reported bid price.

Securities issued by a wholly owned subsidiary of a Fund will be valued at the subsidiary's net asset value, which will be determined using the same pricing policies and procedures applicable to the Fund.

Securities for which market prices are not "readily available," or are not deemed to reflect current market values, or are instruments where no evaluated price is available from the Trust's third-party pricing agents pursuant to established methodologies, are fair valued in accordance with the Trust's valuation policies and procedures approved by the Board of Trustees. Some of the more common reasons that may necessitate that a security be valued using "fair value" pricing may include, but are not limited to: the security's trading has been halted or suspended; the security's primary trading market is temporarily closed; or the security has not been traded for an extended period of time. A Fund may fair value certain of the foreign securities held by the Fund each day the Fund calculates its NAV.

In addition, a Fund may fair value its securities if an event that may materially affect the value of the Fund's securities that trade outside of the United States (a "Significant Event") has occurred between the time of the security's last close and the time that the Fund calculates its NAV. A Significant Event may relate to a single issuer or to an entire market sector, country or region. Events that may be Significant Events may include: government actions, natural disasters, armed conflict, acts of terrorism and significant market fluctuations. If Krane becomes aware of a Significant Event that has occurred with respect to a portfolio instrument or group of portfolio instruments after the closing of the exchange or market on which the portfolio instrument or portfolio instruments principally trade, but before the time at which a Fund calculates its NAV, it will notify the Administrator and may request that an ad hoc meeting of the Fair Valuation Committee be called.

With respect to trade-halted securities, the Trust typically will fair value a trade-halted security by adjusting the security's last market close price by the security's sector performance, as measured by a predetermined index, unless Krane recommends and the Trust's Fair Valuation Committee determines to make additional adjustments. Certain foreign securities exchanges have mechanisms in place that confine one day's price movement in an individual security to a pre-determined price range based on that day's opening price ("Collared Securities"). Fair value determinations for Collared Securities will generally be capped by Krane based on any applicable pre-determined "limit down" or "limit up" prices established by the relevant foreign securities exchange. As an example, China A-Shares can only be plus or minus ten percent in one day of trading in the relevant mainland China equity market. As a result, the fair value price determination on a given day will generally be capped plus or minus ten percent.

Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could actually be realized upon the sale of the security or that another fund that uses market quotations or its own fair value procedures to price the same securities. In addition, fair value pricing could result in a difference between the prices used to calculate a Fund's NAV and the prices used by the Underlying Index. This may adversely affect a Fund's ability to track the Underlying Index.

Shareholder Information

Trading in securities on many foreign exchanges is normally completed before the close of business on each Business Day. In addition, securities trading in a particular country or countries may not take place on each Business Day, such as during a foreign market holiday, or may take place on days that are not Business Days. Changes in valuations on certain securities may occur at times or on days on which a Fund's NAV is not calculated and on which Fund shares do not trade and sales and redemptions of shares do not occur. As a result, the value of a Fund's portfolio securities and the net asset value of its shares may change on days when you will not be able to purchase or sell your shares.

Buying and Selling Fund Shares

Shares of a Fund may be purchased or redeemed directly from the Fund only in Creation Units or multiples thereof. Only a broker-dealer ("Authorized Participant") that enters into an Authorized Participant Agreement with the Fund's distributor, SEI Investments Distribution Co. (the "Distributor"), may engage in creation and redemption transactions directly with the Fund. Purchases and redemptions directly with a Fund must follow the Fund's procedures, and are subject to transaction fees, which are described in the SAI. The transaction fee will not exceed 2.00% of the value of the Creation Units purchased or redeemed, which is used to compensate the Fund for any difference for the expenses incurred by it in connection with the purchase or redemption order. Orders for such transactions may be rejected or delayed if they are not submitted in good order and subject to the other conditions set forth in this prospectus and the SAI.

Purchases and redemptions of Creation Units will take place in-kind and/or for cash at the discretion of each Fund. The determination of whether purchases and redemptions of Creation Units will be for cash or in-kind depends primarily on the regulatory requirements and settlement mechanisms relevant to a Fund's portfolio holdings and a Fund is not limited to engaging in in-kind transactions to any particular market circumstances. As further described in the SAI, Creation Units typically are issued on a two Business Days ("T+2") basis after a purchase order has been received in good order and the transfer of good title to the Fund of any in-kind securities and/or cash required to purchase a Creation Unit have been completed (subject to certain exceptions). Similarly, and also as further described in the SAI, deliveries of redemption proceeds by a Fund generally will be made on a T+2 basis after a redemption order has been received in good order and the requisite number of Fund shares have been delivered (subject to certain exceptions). Each Fund reserves the right to settle Creation Unit transactions on a basis other than T+2 in order to, among other matters, accommodate non-U.S. market holiday schedules, closures and settlement cycles, to account for different treatment among non-U.S. and U.S. markets of dividend record dates and ex-dividend dates (i.e., the last day the holder of a security can sell the security and still receive dividends payable on the security) and in certain other circumstances. The Funds have received exemptive relief to delay such settlement for up to 14 days from the date an order has been submitted in good order and the requisite cash and/or assets delivered to the relevant Fund to accommodate foreign holidays, as further described in the SAI, and otherwise may delay redemptions up to 7 days or longer as permitted by applicable law, regulations and interpretations such as where unusual market conditions affect the NYSE or an emergency exists which makes it impracticable for the a Fund to dispose of or value securities it owns or the Fund has received an SEC order.

Each Fund intends to comply with the U.S. federal securities laws in accepting securities for deposit and satisfying redemptions with redemption securities by, among other means, assuring that any securities accepted for deposit and any securities used to satisfy redemption requests will be sold in transactions that would be exempt from registration under the Securities Act. Further, an Authorized Participant that is not a "qualified institutional buyer," as such term is defined under Rule 144A of the Securities Act, will not be able to receive restricted securities eligible for resale under Rule 144A.

Shareholder Information

Once created, shares are listed on the Exchange and trade in the secondary market. When you buy or sell a Fund's shares in the secondary market, you will pay or receive the market price. Shares can be bought and sold throughout the trading day like other publicly traded securities. Most investors will buy and sell shares through a broker and, thus, will incur customary brokerage commissions and charges when buying or selling shares.

The secondary markets are closed on weekends and also are generally closed on the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day (observed), Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day.

For more information on how to buy and sell shares of a Fund, call 1.855.857.2638 or visit www.kfafunds.com.

Share Trading Prices and Intraday Indicative Value

The trading prices of a Fund's shares listed on its Exchange may differ from the Fund's daily NAV and can be affected by market forces of supply and demand, economic conditions and other factors.

The Exchange intends to disseminate an "intraday indicative value" ("IIV") for each Fund every fifteen seconds during the trading hours of each Business Day. The IIV is calculated for each Fund by: (i) calculating the current value of the deposit instruments and any short positions; (ii) calculating the estimated amount of cash and/or money market instruments per creation unit held in the Fund's portfolio; (iii) calculating the current in-the-money or out-of-the-money value of the financial instruments held by the Fund, if any, (iv) adding (i) through (iii) to arrive at a value and (v) dividing that value by the number of shares in a Fund creation unit. The IIV should not be viewed as a "real-time" update of the NAV of a Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, and may include stale values. The Funds are not involved in, or responsible for, the calculation or dissemination of the IIVs and make no warranty as to their accuracy.

Premium/Discount Information

Information showing the number of days the market price of each Fund's shares was greater than the Fund's NAV per share (*i.e.*, at a premium) and the number of days it was less than the Fund's NAV per share (*i.e.*, at a discount) for various time periods is available by visiting the Fund's website at www.kfafunds.com. The premium and discount information contained on the website represents past performance and cannot be used to predict future results.

Portfolio Holdings Information

A description of the Funds' policies and procedures with respect to the disclosure of Fund portfolio securities is available in the Funds' Statement of Additional Information ("SAI"). The holdings of a Fund can be found on the Funds' website at www.kfafunds.com.

Active Investors and Market Timing

The Trust's Board of Trustees has determined not to adopt policies and procedures designed to prevent or monitor for frequent purchases and redemptions of each Fund's shares because each Fund sells and redeems its shares at NAV only in Creation Units pursuant to the terms of an Authorized Participant Agreement between the Authorized Participant and the Distributor, and such direct trading between the Fund and Authorized Participants is critical to ensuring that the Fund's

Shareholder Information

shares trade at or close to NAV. Further, the vast majority of trading in Fund shares occurs on the secondary market, which does not involve a Fund directly and therefore does not cause the Fund to experience many of the harmful effects of market timing, such as dilution and disruption of portfolio management. In addition, each Fund imposes a transaction fee on Creation Unit transactions, which is designed to offset transfer and other transaction costs incurred by the Fund in connection with the issuance and redemption of Creation Units and may employ fair valuation pricing to minimize potential dilution from market timing. Each Fund reserves the right to reject any purchase order at any time and reserves the right to impose restrictions on disruptive, excessive, or short-term trading.

Investments by Registered Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including shares of each Fund. Registered investment companies are permitted to invest in a Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Fund.

Continuous Offering

The method by which Creation Units of Fund shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of shares are issued and sold by each Fund on an ongoing basis, a “distribution,” as such term is used in the Securities Act, may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent shares and sells the shares directly to customers or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in shares, whether or not participating in the distribution of shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the shares that are part of an overallotment within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

Shareholder Information

Dealers effecting transactions in a Fund's shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of a Fund through a broker-dealer or other financial intermediary (such as a bank), Krane, a Fund sub-adviser or an affiliate may pay the intermediary for marketing activities or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Distribution Plan

Each Fund has adopted a Distribution Plan (the "Plan") that allows the Fund to pay distribution fees to the Distributor and other firms that provide distribution services ("Service Providers"). Under the Plan, if a Service Provider provides distribution services, a Fund would pay distribution fees to the Distributor at an annual rate not to exceed 0.25% of average daily net assets, pursuant to Rule 12b-1 under the 1940 Act. The Distributor would, in turn, pay the Service Provider out of its fees. The Board of Trustees currently has determined not to implement any 12b-1 fees pursuant to the Plan. 12b-1 fees may only be imposed after approval by the Board of Trustees. Because any distribution fees would be paid out of a Fund's assets on an on-going basis, if payments are made in the future, the distribution fees would increase the cost of your investment and may cost you more than paying other types of sales charges.

Householding Policy

To reduce expenses, we mail only one copy of the prospectus or summary prospectus, each annual and semi-annual report, and any proxy statements to each address shared by two or more accounts with the same last name or that the Trust reasonably believes are members of the same family. If you wish to receive individual copies of these documents, please call the Trust at 1.855.857.2638 between the hours of 8:30 a.m. and 6:00 p.m. Eastern Time on days the Fund is open for business or contact your financial institution. We will begin sending you individual copies thirty days after receiving your request. **Investors who hold their shares through an intermediary are subject to the intermediary's policies. Contact your financial intermediary for any questions you may have.**

Dividends and Distributions

Each Fund pays out to its shareholders any net investment income and net realized capital gains. Ordinarily, each Fund makes any distributions once a year (usually in December), except that the KFA Dynamic Fixed Income ETF typically distributes any net investment income monthly. Each Fund may make distributions on a more frequent basis. A Fund may occasionally be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom you purchased shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you. Each Fund reserves the right to declare special distributions, including if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Fund as a regulated investment company under Subchapter M of the Code or to avoid imposition of income or excise taxes on undistributed income.

Additional Tax Information

The following is a summary of some important tax issues that affect each Fund and its shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a detailed explanation of the tax treatment of the Funds, or the tax consequences of an investment in a Fund. **More information about taxes is located in the SAI. You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.**

Tax Status of each Fund

Each Fund is treated as a separate entity for federal tax purposes, and intends to qualify for the special tax treatment afforded to regulated investment companies. As long as a Fund qualifies for treatment as a regulated investment company, it pays no federal income tax on the earnings it distributes to shareholders.

Tax Status of Distributions

Each Fund will, at least annually, distribute substantially all of its net investment taxable income and net capital gains.

The income dividends you receive from a Fund (which include the Fund's short-term capital gains) will be taxed as either ordinary income or qualified dividend income. For non-corporate shareholders, dividends that are reported as qualified dividend income are generally taxable at reduced maximum tax rates to the extent that the Fund receives qualified dividend income and subject to certain limitations and holding period requirements.

Distributions of a Fund's short-term capital gains are generally taxable as ordinary income. Any distributions of net capital gain (the excess of a Fund's net long-term capital gains over its net short-term capital losses) are taxable as long-term capital gains regardless of how long you have owned your shares. Long-term capital gains are taxable at reduced maximum tax rates.

If a Fund makes distributions to a shareholder in excess of the Fund's current and accumulated earnings and profits in any taxable year, the excess distribution will be treated as a return of capital to the extent of the shareholder's tax basis in its shares, and thereafter as capital gain. A return of capital reduces a shareholder's tax basis in its shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by the shareholder of its shares.

Each Fund may invest in complex securities. These investments may be subject to numerous special and complex rules. These rules could affect whether gains and losses recognized by a Fund are treated as ordinary income or capital gain, accelerate the recognition of income to the Fund and/or defer the Fund's ability to recognize losses. In turn, these rules may affect the amount, timing or character of distributions you receive from a Fund.

Dividends and distributions are generally taxable to you whether you receive them in cash or in additional shares. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive that is attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. The KFA Dynamic Fixed Income ETF does not expect to distribute dividends eligible for qualified dividend income treatment or the dividends received deduction.

Additional Tax Information

Distributions paid in January but declared by a Fund in October, November or December of the previous year may be taxable to you in the previous year. Your broker will inform you of the amount of your ordinary income dividends, qualified dividend income, and capital gains distributions shortly after the close of each calendar year.

If you lend your Fund shares pursuant to securities lending arrangements, you may lose the ability to treat the Fund's dividends (paid while the shares are held by the borrower) as qualified dividend income. Consult your financial intermediary or tax adviser.

Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries a portion of these withholding taxes is recoverable, the non-recovered portion will reduce the income received from the securities in a Fund. If more than 50% of the total assets of a Fund at the close of a year consist of non-U.S. stocks or securities, then the Fund may elect, for U.S. federal income tax purposes, to treat certain non-U.S. income taxes (including withholding taxes) paid by the Fund as paid by its shareholders.

If you hold your shares in a tax-qualified retirement account, you generally will not be subject to federal taxation on income received with respect to the shares (including Fund dividends and distributions, and any gain on the sale of shares), until you begin receiving payments from your retirement account. You should consult your tax adviser regarding the tax rules that apply to your retirement account.

Tax Status of Share Transactions

Any capital gain or loss upon a sale of a Fund's shares is generally treated as a long-term gain or loss if the shares have been held for more than one year and as a short-term gain or loss if held for one year or less. Any capital loss on the sale of a Fund's shares held for six months or less is treated as a long-term capital loss to the extent that any capital gain distributions were paid with respect to such shares.

Medicare Contribution Tax

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% Medicare contribution tax on all or a portion of their "net investment income," including interest, dividends, and certain capital gains (including capital gains realized on the sale or exchange of shares of a Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Back-Up Withholding

Each Fund will be required in certain cases to withhold at applicable withholding rates (currently 24%) and remit to the U.S. Treasury the amount withheld on amounts payable to any shareholder who (1) has provided the Fund either an incorrect tax identification number or no number at all, (2) is subject to back-up withholding by the Internal Revenue Service ("IRS") for failure to properly report payments of interest or dividends, (3) has failed to certify to the Fund that such shareholder is not subject to back-up withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien).

Non-U.S. Investors

If you are not a citizen or permanent resident of the United States or if you are a non-U.S. entity, each Fund's ordinary income dividends (which include distributions of net short-term capital gains) will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies, provided that

Additional Tax Information

withholding tax will generally not apply to any gain or income realized by a non-U.S. shareholder in respect of any distributions of long-term capital gains or upon the sale or other disposition of shares of the Fund. The withholding tax also will not apply to any interest-related dividends and short-term capital gain dividends reported by the Fund. You also may potentially be subject to U.S. federal estate taxes.

A 30% withholding tax will generally be imposed on dividends paid by a Fund to (i) foreign financial institutions including non-U.S. investment funds unless they agree to collect and disclose to the IRS, or the tax authorities in their home jurisdictions, information regarding their direct and indirect U.S. account holders and (ii) certain other foreign entities, unless they certify certain information regarding their direct and indirect U.S. owners. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an intergovernmental agreement between the United States and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement. Proposed regulations (which are effective while pending) eliminate the application of the Foreign Account Tax Compliance Act ("FATCA") withholding tax to capital gain dividends and redemption proceeds that was scheduled to take effect in 2019.

State Tax Considerations

In addition to federal taxes, distributions by a Fund and ownership of a Fund's shares may be subject to state and local taxes. You should consult your tax adviser regarding how state and local tax laws affect your investment in the Fund's shares.

Taxes on Creations and Redemptions of Creation Units

A person who purchases a Creation Unit by exchanging securities in-kind generally will recognize a gain or loss equal to the difference between (i) the sum of the market value of the Creation Units at the time of the exchange and any net amount of cash received by the Authorized Participant in the exchange and (ii) the sum of the purchaser's aggregate basis in the securities surrendered and any net amount of cash paid for the Creation Units. A person who redeems Creation Units and receives securities in-kind from a Fund will generally recognize a gain or loss equal to the difference between the redeemer's basis in the Creation Units, and the aggregate market value of the securities received and any net cash received. The IRS, however, may assert that a loss realized upon an in-kind exchange of securities for Creation Units or an exchange of Creation Units for securities cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons effecting in-kind creations or redemptions should consult their own tax adviser with respect to these matters.

Each Fund has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to section 351 of the Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. Each Fund also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determinations.

Disclaimers

KFA Dynamic Fixed Income ETF Krane, Skyrock and Trust Disclaimer

Krane, Skyrock and the Fund make no representation or warranty, express or implied, to the owners of shares of the Fund or any members of the public or as to the advisability of investing in securities generally or in the Fund particularly. Financial Highlights

The table that follows presents the financial highlights for each Fund that was operational as of the fiscal period ended March 31, 2020. The table is intended to help you understand each Fund's financial performance. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost, on an investment in each Fund (assuming reinvestment of all dividends and distributions). The information for the fiscal period ended March 31, 2020 has been derived from financial statements audited by KPMG LLP, the Trust's independent registered public accounting firm, whose report, along with the financial highlights and financial statements, is included in the annual report to shareholders dated March 31, 2020, which is incorporated by reference herein and is available upon request.

** Total return is based on the change in net asset value of a share during the year or period and assumes reinvestment of dividends and distributions at net asset value. Total return is for the period indicated and periods of less than one year have not been annualized. The return shown does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Excludes effects of standard creation and redemption transaction fees associated with creation units.

† Annualized.

†† Portfolio turnover rate is for the period indicated and periods of less than one year have not been annualized. Excludes effect of in-kind transfers.

Amounts designated as “—” are \$0 or have been rounded to \$0.

KraneShares

Additional Information

Additional and more detailed information about the Funds is included in the SAI dated August 1, 2020. The SAI has been filed with the SEC and is incorporated by reference into this Prospectus and, therefore, legally forms a part of this Prospectus. The SEC maintains the EDGAR database on its website ("<http://www.sec.gov>") that contains the SAI, material incorporated by reference, and other information regarding registrants that file electronically with the SEC. Copies of this information may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov.

You may obtain a copy of the SAI or the Annual or Semi-Annual Reports or make inquiries, without charge by calling 1.855.857.2638, visiting www.kfafunds.com, or writing the Trust at 280 Park Avenue, 32nd Floor, New York, NY 10017. Additional information about the Fund's investments will be available in the Annual and Semi-Annual Reports. Also, in the Fund's Annual Report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year.

No one has been authorized to give any information or to make any representations not contained in this Prospectus or in the Fund's SAI in connection with the offering of Fund shares. Do not rely on any such information or representations as having been authorized by the Fund, Krane or the sub-adviser, as applicable. This Prospectus does not constitute an offering by the Fund in any jurisdiction where such an offering is not lawful.

The Trust enters into contractual arrangements with various parties, including among others, the Fund's investment adviser, sub-adviser(s) (if applicable), distributor, custodian, and transfer agent who provide services to the Fund. Shareholders are not parties to any such contractual arrangements or intended beneficiaries of those contractual arrangements, and those contractual arrangements are not intended to create in any shareholder any right to enforce them against the service providers or to seek any remedy under them against the service providers, either directly or on behalf of the Trust.

This prospectus provides information concerning the Fund that you should consider in determining whether to purchase Fund shares. Neither this prospectus nor the SAI is intended, or should be read, to be or give rise to an agreement or contract between the Trust, the Trustees, or the Fund and any investor, or to give rise to any rights in any shareholder or other person other than any rights under federal or state law that may not be waived.

The Trust's Investment Company Act file number is 811-22698.
